Dear Environmental Planner Harris,

As a Washington inspection company, I urge you to halt rulemaking on Chapter 173-423 WAC, the Clean Vehicles Program.

Tying our state to California's EV mandates will directly increase the cost of doing business in our state.

I work with multiple builders and home providers and the EV mandates will impact the cost of doing business.

With federal waivers rescinded, Washington no longer has legal authority to move forward. so I would recommend that you stop the process at this point and save everyone frustration and wasted efforts.

Sincerely,

Ron Perkerewicz 10000 Central Valley Rd NE Bremerton, WA 98311 perk120@aol.com
