

## Mollie Grow

I am a pediatrician and parent and also a bicyclist who bikes to work most days. I am so grateful for cleaner air for children and for us as parents. Diesel trucks are one of the most noticeable air pollutants when you are out walking and biking with kids. This is an exciting time for new technology to improve that and clean up our air for all to enjoy - and for the health benefits. I know we can do the right thing! Please commit to a cleaner future!
