

Julie Balmelli-Powe

Just stop already. Stop imposing expensive mandates on the citizens of Washington that have proven time and time again to make little to no improvement to air quality and the climate. How many more businesses and people do you have to drive out of this great state of Washington before you realize you are driving this state into the ground. Wake up, open your eyes...stop all of this insanity!

Definition of insanity - "doing the same thing over and over again and expecting different results" - Albert Einstein
