

# Evey Winther

What is the number one action Washington should take to promote clean transportation and/or reduce transportation emissions?

Invest in electric vehicle charging infrastructure.

What types of programs would you like to see Washington State assess and possibly implement to meet air quality and climate targets for transportation?

Public EV Charging and Truck Stop Electrification projects that involve the community and drivers.

Programs to help fleets convert to electric trucks, buses, and port equipment.

What kinds of programs, other than financial support, could provide incentive to purchase and operate zero-emission vehicles and equipment?

Ride-and-Drive, Community involvement with local EV Charging coalitions, and Clean Fuels Coalitions

What principles for program design ensure we don't leave any Washingtonians behind in the transition to zero-emission transportation?

Make sure there are strategies to work with disadvantaged businesses, minority-owned, women-owned, and veteran-owned businesses. Target multi-family housing for EV charging equity.
