

Climate Action of Southwest Washington (Don Steinke)

1. Keep this in mind. Semi-trucks don't need to be long haul. They're usually short haul such as from a Safeway warehouse to Safeway stores within 50 miles, or such as Frito Lay plans to have in Vancouver WA. They make the chips in Vancouver and plan to use a Tesla Semi to take the chips to their distribution center 25 miles away in Portland. Potato chips are not very heavy.
