

Mike Petersen

Greetings. I would like to comment that I support ZEVergreen. Washington should action on clean transportation is important to me and my community to improve our well being. The state needs to make up for the federal government moving backwards on climate and clean transportation policy. The state should help people access electric vehicles, especially people living on lower incomes who will especially benefit from not having to pay for gas! Washington should make sure that EV charging is easy and simple. I am volunteering on the Spokane County Climate Advisory Committee and we discuss the importance of shifting to electric vehicles. Having the state lead would be great!

Thanks, Mike Petersen
