

Diana Peters

I do not want any more initiatives that increase taxes. I can't afford an EV car and I don't qualify for any federal or state EV tax credits. I don't want to subsidize other people's cars. I can barely afford child care, gas, rising insurance prices, rising property taxes. I can't handle another Washington state tax rise. Unless you work for a tech company it's very challenging to live in this state due to the high cost of living.
