

Joelle Robinson

I support ZEVergreen. State action on clean transportation is important to me and my community, and especially to the well-being of my five-year-old and his peers. The state needs to make up for the federal government moving backwards on climate and clean transportation policy.

It is important for the state to help people access electric vehicles, especially people living on lower incomes who will especially benefit from not having to pay for gas. A top priority is to that WA should make sure that EV charging is easy and simple. As you know, transportation is our state's largest source of climate pollution; to meet our climate targets, we need to invest in helping people access clean transportation. Thank you for your work and for your consideration.
