

Diane Adkin

Please protect clean vehicle standards and fight revoking the state's authority. There are plenty of moves the Department of Ecology could make to prioritize clean vehicles in the face of the Trump administration's attacks. For example:

Accelerating clean vehicle commitments for passenger cars, trucks, and fleets

Replacing lost federal EV tax credits with stronger state-level incentives

Expanding zero-emission infrastructure and funding for disadvantaged communities

Enacting clean fleet requirements for public and private vehicle operators

Creating new jobs with a just transition strategy for EV manufacturing and maintenance

Holding polluters and automakers accountable if they oppose Washington State's progress
