Maintaining strong ecological policies for Washington State are crucial. WA already faces the loss of our State mammal, the So. Resident Orca population due to continuing pollutants in our oceans; salmon runs are also being depleted & are the primary food source for the orca. WA has stood strong amongst both regular residents & Tribal Populations; we want to continue to be the Evergreen State!!! Reject any actions by an illegal administration (a President convicted of 34 felonies & thus is flaunting Constitutional requirements); we don't want ANY of our Ecological protections reduced! I stand strong AGAINST any changes to the protections we have in place. Thank you for considering my views. Respectfully submitted.
