

Devon Kellogg

I support ZEVergreen. State action on clean transportation is important to me and my community, family, health, well-being!

The state needs to make up for the federal government moving backwards on climate and clean transportation policy.

The state should help people access electric vehicles, especially people living on lower incomes who will especially benefit from not having to pay for gas!

WA should make sure that EV charging is easy and simple.

The state should continue to support alternative forms of transportation such as transit, bike lanes, trails, pedestrian crossings, and metro flex programs!

Help public school district and metro fleets get access to clean EV buses, and pilot using the batteries to support local grids!

Transportation is our state's largest source of climate pollution; to meet our climate targets, we need to invest in helping people access clean transportation.
