

Denise Farrer

I support ZEVergreen. Washington State action on clean transportation is important to me and my community, family, health, well-being!

The state should help people access electric vehicles, especially people living on lower incomes who will especially benefit from not having to pay for gas!

Washington should make sure that EV charging is easy and simple.

Transportation is our state's largest source of climate pollution; to meet our climate targets, we need to invest in helping people access clean transportation.

When I use rideshare or rental vehicles I try to choose hybrid and electric vehicles whenever available, which is often not possible. Making it easier for these services to have electric vehicles needs to be a priority.
