

Annette Ringe

Hello, The cost to register an EV is prohibitive. When you don't drive that far daily but do have long distance drives at time it's hard to rationalize that cost when you are having to spend that much on your car registration. Perhaps it would be easier to pay this monthly if the state could find a way to set that up. Also, we make too much money to get any of the assistance that WA offers but we don't quite make enough to afford that monthly payment for an EV without the rebates. Thanks for taking comments!
