

Pedro Torres

How are you going to make EV's more affordable? How about affordable GASOLINE? 1 of 5 New Vehicles purchased, is likely to upper class economically well off people. Most of MY CONSTITUENTS, District 3 of Franklin County PUD are not able to afford those vehicles New, Let Alone USED even with the rebates provided. We have the highest Gasoline Prices, and my constituents are suffering because of IGNORANT DECISIONS that DO NOT CONSIDER the lives of poor people in Washington just getting by.

IF AFFORDABLE EVS = MORE TAXES, then that is a big NO. We need affordability & environmental consciousness to go hand in hand. Figure it out, or I will run for your position and represent the poor financially marginalized people you and your well off friends think you can ignore. Not for long.
