

City of Spokane (Robert Duff)

Thank you for the opportunity to comment on the proposed rule language related to linking the Climate Commitment Act Cap-and-Invest program with other entities (CR-102/(173-446 WAC)). The City of Spokane submits the following comments.

The City of Spokane would like confirmation that this current rule-making will not affect our Waste-to-Energy facility with respect to recent RCW changes enacted with passage of House Bill 2416. Specifically, we would like to confirm that the no-cost allowances provided in statute for the years 2027 through 2030 will not be affected by the proposed compliance period changes. In addition, we would also like clarification on whether there will be any changes to the consignment of no-cost allowances that will affect the City's WTE facility.
