Thank you for the opportunity to comment on the proposed revisions to Chapter 173-423, Washington's Clean Vehicles Program rule. I appreciate Washington state's vehicle emission standards because keeping Washington's air clean is critically important to my family's health, especially those who suffer severely from asthma and heart disease.

I strongly support the amendments in this rulemaking, because they provide Washington with a backstop to protect against increased on-road pollution, pending litigation.

Thank you for your consideration, and for your work to establish standards that protect Washington's environmental and public health.
