

Robert Krause
84 Homestead Trail
White Lake, NY 12786

18 February 2018

DRBC

To whom it may concern:

Issue:

Food supply contamination from the hydraulic fracturing waste water.

Details:

A compendium of food supply problems prepared by Martha Goodsell, February 15, 2011

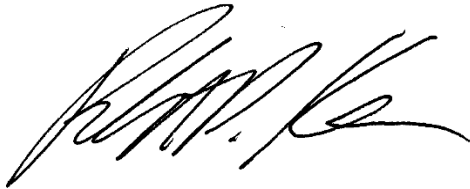

<http://www.pasafarming.org/resource/publications/Local.pdf>

This compendium of reference articles thoroughly examines the incompatibility of the fracking process with an uncontaminated food supply.

Recommendation:

A moratorium on hydraulic fracturing and its waste water must be instituted until it is proven safe for people, livestock, and agriculture production.

Sincerely,
