Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Rosalind Pino, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mrs Vivien Trichter, East Windsor, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you. I have read this message and condone it. Please protect the drinking water for our communities. Drawing water from the river for fracking will move the salt line far too deep into the interior damaging the ecosystem. Allowing waste treatment will cause heavy metals and other contaminants to enter our water supply as they did in the Susquehanna River. Guess who pays to filter this stuff out for the next millennia? We the people and not the entities making all the money off of fracking. The love of money (greed) is the root of all kinds of evil! Timothy 6:10 This is a prime example of the evils it spawns. Put the Christ back in Christians. Give a damn.

—Mr Thomas Moore, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. & Mrs. John & Elizabeth Kramarck, Townsend, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—MS janice lynx, astoria, NY

Dear Members of the Delaware River Basin Commission: I'm pleased to learn that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. But in their current form, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could allow companies to draw freshwater from the watershed for use in fracking elsewhere. This is unacceptable-- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Loraine A. Peek, Tappan, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Susan Augenbraun, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mr J L, NY, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. David White, Beverly, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Linda Frye, Lock Haven, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. This is just another way to punish blue states by allowing the water to be fouled. People will need to move elsewhere: gerrymandering, anybody? Thank you.

— Select -Mr. Christopher F. Vota, Eastampton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Thom Thacker, Irvington, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Don Hibbard, Springville, PA

Dear Members of the Delaware River Basin Commission: I commend you in taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. The recent draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. We require regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be permitted in the watershed. I urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Barbara Dibeler, Stone Ridge, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Merja Harju, Trenton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Louise Golub, Saratoga Springs, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! —Mrs. Katalin Kónya-Jakus, Szatymaz, NY

Dear Members of the Delaware River Basin Commission: Please take an honest look at other states that have had fracking for years now. There are environmental concerns and dangerous effects cropping up everywhere. I implore YOU all to do the **ABSOLUTE MOST AND STRINGENT AND PERMANENT REGULATIONS TO BAN FRACKING AND PROTECT OUR WATER AND OVERALL ENVIRONMENT.** I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Ana Acosta, Basking Ridge, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Richard Mogavero, Esopus, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Gregg Erickson, Mountain Dale, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Veronica Carrasco, McAllen, TX

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Lili Traband, Long Beach, CA

Dear Members of the Delaware River Basin Commission: Don't go the route of most of PA. where watershed organizations are not present. Effectively, our & most PA. drinking water is unprotected. When I viewed the open containment ponds in Washington County and learned from friends that wastewater was being accepted in McKeesport and Clairton to be chlorinated and deposited into the Monongahela River, my home's source of tap water, I started in 2008 buying Gerolsteiner Wasser, drinking water imported from Germany as that country is committed to protecting the health of its residents in stark contrast to PA. I continue to use Gerolsteiner Wasser as my drinking water @ significant cost and trouble for myself in hopes of avoiding the toxins created by fracking - a practice that has been destroying our birthright as Pennsylvanians since 2004. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Fran Harkins, Munhall, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Nancy Gallt, South Orange, NJ

Dear Members of the Delaware River Basin Commission: Don't go the route of most of PA. where watershed organizations are not present. Effectively, our & most PA. drinking water is unprotected. When I viewed the open containment ponds in Washington County and learned from friends that wastewater was being accepted in McKeesport and Clairton to be chlorinated and deposited into the Monongahela River, my home's source of tap water, I started in 2008 buying Gerolsteiner Wasser, drinking water imported from Germany as that country is committed to protecting the health of its residents in stark contrast to PA. I continue to use Gerolsteiner Wasser as my drinking water @ significant cost and trouble for myself in hopes of avoiding the toxins created by fracking - a practice that has been destroying our birthright as Pennsylvanians since 2004. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. John R Long, Buffalo, NY

Dear Members of the Delaware River Basin Commission: As a mother, grandmother and great grandmother vitally concerned with having a healthy planet for current and future generations, I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Judith McElwain, S. Setauket, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Lynn Merle, Vineland, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. William Allen, Baldwinsville, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Karen Katrinak, Pennsburg, PA

Dear Members of the Delaware River Basin Commission: I am glad you are taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction -- but these rules are not good enough. As written, they could open the watershed to storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This is not acceptable. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms M Z. Kirby, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Ms. Antoinette Meale, Haddon Township, NJ

Dear Members of the Delaware River Basin Commission: Many communities in Pennsylvania have been harmed by fracking. In the American West, persistent earthquakes have been linked to fracking. I think we in the East have been wise to ban fracking. Let's make the protections to our water complete. We can solve this problem on the front end. We can prevent human and ecological harm that will occur from drilling, water removal, and water replacement. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jim Stickler, Harris, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Paul McCarthy, Schenectady, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Dana Fite, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm extremely encouraged to hear that you're taking steps to protect the Delaware River Basin. It is a critical wildlife refuge, one of the few remaining healthy river systems in USA, and the source of drinking water of 15 million people. We must protect all this from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. Sadly, however, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Veronica Bassil, South Fallsburg, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. matthew daynard, Schoharie, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Ed Brennan, Union, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. BUT, we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. You were elected to do what's best for the people. That means: no drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Thank you, Carol Ast

—Ms Carol Ast, Ithaca, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. iman Ghavami, LONDON W6, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Lois Stewart, Flemington, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Susan Crowle, Auburn, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. —Mrs Laurie Azzoto, Liverpool, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Laurie Azzoto, Liverpool, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Mark Westcott, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Lynn Mignola, Bedminster, NJ

—Ms. Donna Robin Lippman, NY, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Kathleen Macri, Binghamton, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Joe Crymes, Ithaca, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Jackie Besser, Neosho, MO

Dear Members of the Delaware River Basin Commission: I'm happy to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Fracking is a danger to the drinking water and wellbeing of millions of Americans. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Paul Rothman, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—gerry s mcfadden, turnersville, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Jill Simon, NYC, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Martin Margolis, New York, NY

Dear Members of the Delaware River Basin Commission: Good to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. -Your recently released draft regulations are an important step in the right direction. ---But these rules definitely don't go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater!! --And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. You must say NO to this. -- We need regulations that permanently BAN fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Thomas Simon, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Leonard Orlandella, Liverpool, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. ""Please"" ""Governor's"", heed the call, from all these people, that urge you, beg you, to understand this Fracking is a proven failed attempt to extract gas. DO NOT PLAY POLITICS WITH OUR LIFE! The horizontal process for extraction is so alarming, using too much water and you know it. Pay attention NOW because when this Delaware gets damaged, with toxic waste or the withdrawal of its water get depleted, you, can not, come up with, the solutions, for a sound answer, on how you rectify its problem. YOU CAN'T MAKE IT RIGHT! You can't refine the water by repeated distillations until a degree of purity is obtained. IT IS A RIVER FOR GOD'S SAKE! Just one error along the way and it affects millions of people. This is life sustaining water for consumption. The value for this gas and the money that is made is not benefiting many in that it brings to few wealth while subjects way to many for its harm. It is detrimental, injurious and they are pernicious acts for greed. This greed is being allowed to have the power of destroying our water supply. One chance, just ONE, evaluate the chance of one serious mistake. Pay careful attention here with the consideration it deserves. The "overwhelming" outcry to say no, can not be ignored and we please ask, for your coherence, that as Governor's, you stick together and place this Ban on fracking near the Delaware or any withdrawal from it and "certainly" never to allow dumping toxins, into this life sustaining water supply. These questions, as to whether these oil and gas industries can be allowed to do it, is just plain stupidity. The science backs up the claim, that this process of gas extraction and the water resources needed, to extract this gas, is two issues. Three strikes your out, because the toxic frack water it produces, is simply "OUT OF THE QUESTION" WHEN IT COMES TO GETTING NEAR THAT RIVER AND ""YOU ALL KNOW IT". PLEASE LISTEN HERE. THANK YOU, YOU HAVE A COMPACT TO PROTECT. THAT IS ""THE DELAWARE RIVER"! GOVERNOR'S

—Mrs. Trudy Lyckowski, Lake Ariel, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert McCann, Clifton Park, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. Kenneth Lapointe, Los Angeles, CA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. John Abbott, Marcus Hook, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Susan Zeiger, Ardsley, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—mr bruce gordon, Fort Lee, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Michael Rhodes, Seven Valleys, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. Robert Fanniff, Latham, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Fanniff, Latham, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. ALAN HANNA, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. ALAN HANNA, New York, NY

—Mr. James Maloney, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Deborah Shaver, Easton, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Richard Trasferini, Vineland, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Richard Trasferini, Vineland, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Akemi Hiatt, DURHAM, NY

Dear Members of the Delaware River Basin Commission: It's important that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. However, the draft regulations need to go further. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Joyce Bryk, Roslyn Hts, NY

Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jo Pa, Bronx, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Blair Decarolis, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Mary Weber, Scottsville, NY

Dear Members of the Delaware River Basin Commission: I am thrilled to hear that you are taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I do not believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Furthermore, they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This is not acceptable -- we need regulations that permanently ban fracking, and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urgently ask you please to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you for your consideration of my letter and for your right moral action on this crucial environmental matter of significant consequence.

—Ms. Holly McDonald, Robbinsville, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Mia McNiece, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! The effects of fracking have detrimental consequences to not only wildlife, but also the lives of millions of people. Instead of putting resources into the dangers and consequences of fracking, they should be used to begin using renewable and safe energy. Please consider the pros of clean energy and do not ignore the future dangers of continued use in non renewable energy. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Madison Tesh, Raleigh, NC

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. hal ganzman, richboro, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Carol Wood, Waterville, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I strongly urge you to prevent this as I don't believe all the consequences of fracking have been fully revealed. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you for your consideration.

—Ms. Ellie Hamel, Devon, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Victoria Poole, Grants Pass, OR

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Keli Myers, Catawba, SC

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Mary Duff, Huntley, IL

Dear Members of the Delaware River Basin Commission: The highlight of my week was to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the toxicity of fracking. While your recently released draft regulations are an important first step, I don't believe these rules go far enough. As written the regulations could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This is insufficient-- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all dangerous fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other deeply concerned citizens, including my aunt who lives in Delaware, urge you to pursue a full ban on fracking and fracking-related activities to keep people's health, their water, and communities safe from harm. Thank you for thoughtfully considering my comments.

—Ms. Monica Koziol, Littleton, CO

Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Donald R. Milliman, Pottstown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Patricia Milizio, Merrick, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. —Mr. Adam Puertas, Corona, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. Which is a violation by stealing (and then polluting) our fresh water. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Marisa DiPaola, Manahawkin, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Brenda Carmichael, Englewood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. June Villeco, Blue Bell, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Goodman, Hempstead, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! It is a shame that so many people are getting rich over investing in those companies that don't care about their fellow man's health. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Anita Emery, Los Angeles, CA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Kelly Krick, South Orange, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. PA is already a mess as I live only 15 minutes from major areas of fracking in PA. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Heather Zahn, Endwell, NY

Dear Members of the Delaware River Basin Commission: Thank you for taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking! Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This is unacceptable!!! We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. NO drilling, NO fracking waste, and NO water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a FULL ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Jane Books, Basking Ridge, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Daniel Tainow, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. Jeff Johnston, Middleburg, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jeff Johnston, Middleburg, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. Eric Brooker, Charleston, SC

Dear Members of the Delaware River Basin Commission: As a resident of Pennsylvania with grave concerns regarding the dangers involved with fracking, I am relieved to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people. Although an important step in the right direction, the recently released draft regulations may not actually go far enough. As written, the regulations could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Kathryn Miller, Catonsville, MD

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ivan Lee, Piscataway, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Chuck Donegan, Selden, NY

Dear Members of the Delaware River Basin Commission: The Delaware River Basin has been at risk from hydraulic fracturing (fracking) to extract fossil fuels for 10+ years. Recently, the DRBC released draft regulations banning fracking in the entire watershed, but these new rules are inadequate to protect the Basin. As President Trump pushes forward with his anti-environment, pro-fossil fuel agenda and EPA Administrator Pruitt recklessly attempts to repeal the Clean Water Rule, it's more important than ever for PA to lead the fight for climate action and protect clean drinking water for all. Please stand up for our environment, climate and health by enacting a comprehensive ban on fracking in the Basin. Please permanently protect the watershed and surrounding communities from fracking and all fracking-related activities. Thank you for your consideration on this matter. Sincerely,

—Mark Harris, Horsham, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Chris Jansen, Swedesboro, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Tim Lietzke, Marlboro, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Melania Padilla, Managua, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Rebecca Turley, Simi Valley, CA

Dear Members of the Delaware River Basin Commission: I have been deeply involved since 1986 in the efforts of the Sourland Conservancy to protect our headwater streams, about 1/3 of which are tributaries of the Delaware River. Our efforts have been in concert with sister environmental groups which overlap with our mission. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Andrea Bonette, Hopewell, NJ

No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Ashley Tose, Kenhorst, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This could be as bad for water quality as allowing fracking. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. The water supply needs to be preserved for local use. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jay R. Greenberg, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Ellen Minde, Dover, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. The value of clean air and water is priceless compared with any profit to be gained from fracking. Thank you.

—Anita Barthel, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. I oppose fracking in the Delaware River watershed for health and environmental reasons. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Jessica Krow, Philadelphia, PA

As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Regi Teasley, Ithaca, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Diane F. Redner, Churchville, PA

—Mr. Paul Kalka, Conshohocken, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Donald Wittle Jr, Newport, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Dolores Snyder, North Brunswick, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. George R. Hill Hill, Bergenfield, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Lenore Annand, Ridgefield, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Shantala Surya, Cherry Hill, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Carol Helm, Mahwah, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr and Mrs David & Christine Brunot, Meadville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr and Mrs David & Christine Brunot, Meadville, PA

And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Patricia Stella, Norwood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Christa Warda, Allentown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mrs. Kate Friedman, Lloyd Harbor, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Susan Whitlock, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Paul Wisniewski, Cheektowaga, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Elizabeth Falconi, Newtown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Alexa Diyarza, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —mr. Kenneth Strong, Levittown,, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you. It is common sense that injecting chemicals below the earth will affect water sources. And it is also common sense that clean water is essential to life. Banning fracking FOREVER is also common sense. Forget about corporate profit and put the health of Americans at the top of your agenda, where it should be. Thank you.

—Ms. Martha Scoppa, Liberty, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Juanita McCormac, Bear, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Camryn Thane, McGregor, TX

And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Granoff, Commack, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Ben Luccaro, New Hope, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —Henning Schiel, Burlington, CO

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Clara Davis, Maplewood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Wesley Hamilton, Harmony, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Annie Ranjan, Parker, CO

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Athena LaTocha, Peekskill, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Terri Rennells, Candor, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Herbert Elwell, Lawrenceville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Jessica Spaccio, Candor, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- WE NEED REGULATIONS THAT PERMANENTLY BAN FRACKING AND ALL RELATED ACTIVITIES AND PERMANENTLY PROTECT THE WATERSHED, ALONG WITH ALL SURROUNDING COMMUNITIES from any and all fracking-related activities. NO drilling, NO fracking waste, and NO water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, URGE YOU TO PURSUE A FULL BAN ON FRACKING AND FRACKING-RELATED ACTIVITIES to keep our health, water, and communities safe from harm. There is no safe place or method for fracking - it ALWAYS produces hazardous waste that threatens to destroy everyone and everything around it. Relying on the industry to provide unbiased, honest scientific data regarding any hazards or health threats is, at the least, absurd and at it's worst, deadly. Thank you.

—Ms. Lori Benton-Janetta, Vineland, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw fresh water from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Elaine Halay, Ossining, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Kimberly Wiley, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Mike Roome, Thompson, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Mike Roome, Thompson, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—mr paulo reeson, toronto, MD

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Joann M. Koch, Lebanon, CT

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Ronald Ratner, Sioux Falls, SD

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Robert Sanders, Temple, GA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Tom Kozel, Clarksville, OH

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Chris Bihler, Phoenix, AZ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Ms. Sheila Dillon, Willmar, MN

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. John Rohrer, New Cumberland, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Joshua Weinberger, NEW YORK, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Susan Norton, Ithaca, NY

Dear Members of the Delaware River Basin Commission: As a PA resident, I'm glad that you are working to protect the Delaware River Basin and the drinking water from the dangers of fracking. While a good start, I'm concerned the regulations may not go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. Thank you.

—Ms. Melissa M. McSwigan, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Miriam Feehily, Borehamwood,

Dear Members of the Delaware River Basin Commission: While I am pleased that you are taking steps to protect the Delaware River Basin and the drinking water of 15 million Americans from the dangers of fracking, I believe the draft regulations need strengthening. As written, these rules could allow opening the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. In addition, they could permit companies to draw freshwater from the watershed for use in fracking in other places. Both of these possibilities concern me greatly. I want to see regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in this vital watershed. Therefore, I urge you to adopt a complete ban on both fracking and fracking-related activities to ensure water stays clean and public health in local communities is protected from harm. Thank you for considering my comments.

—Mr. Wallace Elton, Saratoga Springs, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Kimberly Wiley, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Alexander Dinell, Ocean City, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Do not allow fracking action anywhere in the Delaware water area. IT will poison millions of people and animals and once the water and land are poisoned there is no going back. It is poisoned forever . I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—MS Helga Monning, Woodhaven, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw fresh water from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Ruth Rogers, Woolwich, ME

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. J.C. Ford, South Orange, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. Our water supply is finite and needs to be protected. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Rebecca Mays-Vandewater, Oriskany, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough.
