Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ann Michalowski, PRINCETON JUNCTION, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Joseph Rattman, Stroudsburg, PA

And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Marie Long, Cortlandt Manor, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. David McRitchie, Bound Brook, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr David Allison, Rego Park, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Thaddeus Rada-Bayne, Erie, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Heidi Cleven, Brooklyn, NY

To the Members of the Delaware River Basin Commission: It was welcome news to learn from your draft regulations that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people. Banning fracking is a huge first step and you are to be commended for your active role in the stewardship of our environment. Although the draft regulations are an important step in the right direction, to truly address the problem, there needs to be a few more vital regulations written. As written, the regulations could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater and allow companies to draw freshwater from the watershed for use in fracking elsewhere. If there are loopholes, someone will exploit them. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking related activities. Drilling, fracking waste, and water withdrawals should not be allowed in the watershed. I, and thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Shelly Bernstein, Deer Park, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. María del Mar Collados, Petrer, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. William Reed, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. John Bush, Coatesville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Danielle Serratore, port jefferson station, NY

Dear Members of the Delaware River Basin Commission: I applaud the steps you are taking to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This measure is not enough -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Leland Montgomery, Montclair, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Christine Auda-Koscs, Barnegat, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Olson, Nyack, NY

Dear Members of the Delaware River Basin Commission: The Delaware River Basin is a vital economic resource for a huge area. Fracking and its waste products constitute a threat to life throughout the whole area. Lack of complete protection is an unacceptable risk for the people and states in the Basin. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Paul Wong, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Adriana Nunez, Jersey City, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jose Alfaro, Maywood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Serena M, Akron, PA

Dear Members of the Delaware River Basin Commission: The natural gas bearing geological formations are very shallow in the Delaware River basin. In this limit fracking processes pose a very significant risk of polluting aquifers and surface waters. Therefore, I am heartened to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Donald W. W. Henderson, Ph.D., ITHACA, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. Robert Blair, Cold Spring, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Pamela Carlson, Maplewood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr John Woods, Liverpool, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Betty Richardson, Bethlehem, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Bettina Goodall, Weedsport, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Donna Steiner, Fair haven, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Esther Weaver, Highland, NY

Dear Members of the Delaware River Basin Commission: Fracking has created problems wherever it has occurred, from pollution of groundwater to man-made "earthquakes", and so I was quite thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. But although your recently released draft regulations are an important step in the right direction, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. They could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr Eric Weller, Saratoga Springs, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Linda Loya, Gansevoort, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Joyce Kunz, Jersey City, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Nicholas Cohen, Rochester, NY

Dear Members of the Delaware River Basin Commission: I am encouraged and thrilled to hear that the Delaware River Basin Commission is taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an enormously important step in the right direction. However, as a geologist, conservationist, small farmer, father, and grandfather, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- the public needs regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Clean water is perhaps one of the most valuable natural resources the world has. Though we in New York State are blessed with an abundance of clean, fresh water, our water supply will continue to be under threat from development, industrial processes - to include industrial farming and water extraction - and climate change. We must protect this most vital natural resource. Thank you.

—Mr. Matthew VanBrocklin, Harrisville, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—David Popko, Palmyra, PA

Dear Members of the Delaware River Basin Commission: Please keep our air, water, and green spaces clean and healthy? I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Barbara Malt, Allentown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Richard Winchell, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Marcianne Wright, Langhorne, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Elizabeth Yermack, Skillman, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Camille Marakovitz, Toms River, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Fracking contaminates water and is an extreme waste of such a precious resource. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! You need to completely ban fracking. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Ann I. Aurelio, West Sayville, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. Robert Zantay, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Please take into account that our President and all his appointees are dedicated to destroying our environment in the name of profits. They are dangerous and not grounded in anything resembling reality. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Zantay, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Lisa Kagan, Catskill, NY

Dear Members of the Delaware River Basin Commission: It's great that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. The highly contaminated wastewater from fracking is one of the main reasons why fracking should be banned across this entire planet. So it is, obviously, highly important that not only fracking, itself, be banned from the Delaware Watershed, but that the highly contaminated waste water not be permitted to be stored, "treated" (I have read that the "treating" of fracking waste water doesn't come close to removing all the toxins that are in fracking waste water) or disposed of in the Delaware Watershed. I also understand that, as presently drawn up, your draft regulations would allow companies to draw freshwater from the watershed for use in fracking elsewhere. As you know, millions of people from five different states rely on the Delaware River Basin for their potable water needs. And in the words of T. Boone Pickens, "Water is the next oil." Given that fresh, potable water is so extremely valuable, it's imperative that we not allow the fracking industry to pollute this extremely valuable resource. In short -- we need regulations that permanently ban fracking and protect the Delaware River watershed and surrounding communities from all fracking-related activities. This means No drilling, No fracking waste, and No water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to place a full ban on fracking and fracking-related activities throughout the entire Delaware River Basin watershed. Thank you.

—Ms. Laurine Celeste Fox, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Richard Shiles, Glen Rock, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—mrs nancy ortiz, Perkasie, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Maria Williams, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. The simple banning of fracking, while vitally important and the main issue here, must be supplemented by also banning the accompanying fracking components. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Catherine Sullivan, Averill Park, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—L. A., Medford, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Amy Fields, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—MR. & MRS. HERNAN & FRAN POZA, JR., FOREST HILLS, NY, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Amy Lee, Whitestone, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Yvonne Muller, Warwick, NY

Dear Members of the Delaware River Basin Commission: I'm so encouraged to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. —Mr. George Forman, Gamet Valley, PA

Dear Members of the Delaware River Basin Commission: I write these comments as an Episcopal youth minister as well as a close ally to the Ramapough Lenape Nation of NJ whose traditional homeland is between the Hudson and Delaware river basins and who have a deep commitment to conservation. I am a founding member of the Split Rock Sweetwater Prayer Camp established on their tribal land and also work closely with several Environmental Protection groups in my own Orange County New York region, as well as ties to Lakota tribal communities affected by fracking and its risks much longer in North and South Dakota. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Patricia Campbell, Sterling, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Karen Fleck, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Bette Nadler, Swarthmore, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Diane Maldonado, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Carol March, Willow, NY

Dear Members of the Delaware River Basin Commission: I'm very happy to hear that you are taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step, but they do not go far enough. As written, they open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from ALL fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Freidin, Princeton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Shannon Kelley, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr Robert H. Pierson, Canandaigua, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Denise Deroba, Coraopolis, PA

Dear Members of the Delaware River Basin Commission: PLEASE - we know so much about the dangers of fracking, let's get rid of this dangerous and regressive mode of providing energy. RENEWABLES!!! Clean energy is what we need - and it's the future, AND it's already here, providing jobs. Don't go backwards! And are we really going to allow China and so many other countries show us how regressive and out of touch we are????!! I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Me Gillian Black, Saratoga Springs, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Barbara Supplee, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Jann Jasper, Plainfield, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. The waterways in this area are a compelling reason for people traveling to visit. Don't let them be spoiled by toxic waste! Thank you.

—Christine Maciel, New Windsor, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As you know, the more scientific studies that are done on fracking, the more we realize how dangerous it is to the environment and our health. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Ms. Mary Makofske, Warwick, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Thomas Klusaritz, Allentown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Tyler Okeefe, Bethlehem, PA

This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Judy Abelow, Baldwin, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Joanne Jacobs, Troy, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—mr rick arhart, Wilmington, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Nancy Cunningham, Ringoes, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Nicholas Dollak, Jersey City, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mrs. Nancy O, Newark, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Bethany Worrey, Watkins Glen, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Joshua Robert Enterline, Lewisburg, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert J. Henry, Walworth, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Richard Paugh, Ocean View, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jim Merel, Mays Landing, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Laurie Dusterwald, Merrick, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Miss Veronica Sousa, Princeton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Marty Manson, Huntingdon Valley, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Eveline Grant, Pen Argyl, PA

Dear Members of the Delaware River Basin Commission: I'm relieved to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, these rules contain loopholes. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I urge you to pursue a full ban on fracking >>and fracking-related activities<< to keep our health, water, and communities safe from harm. Thank you.

—Mr. Steve Dickman, Vestal, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Steve LeVine, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Phil Kneer, Bayshore, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Jean E. Wiant, Glenolden, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Eugene Cunningham, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Sanford Robbins, Newark, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Lisa Shumate, Blauvelt, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Martin Perna, State College, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Diane Kuentler, Edgewater, NJ

Dear Members of the Delaware River Basin Commission: I am very attuned to issues of fracking because my family lives in southeastern Ohio, where fracking is taking over this beautiful area. We don't know what long-term health effects they will experience, but on my last visit there was a constant hum from the fracking platform nearby, and when I opened my window at night, a strong odor of chemicals permeated the room. My family does not yet know if the air, water, and even the continual sounds will effect their health, but I do not want other families to be similarly endangered. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —Ms. JENNIFER ZIELINSKI, New Providence, PA

Dear Members of the Delaware River Basin Commission: As 9/11 parents of a heroic US Marine recon Sergeant and New York City firefighter who perished for this country on 9/11 in New York City, we are writing to you in our son's memory. Our 28-year-old son born and raised in New York City traveled extensively throughout this country, was a lover of nature and the environment and was committed to environmental and human health issues. If he were alive today, he would've been active in anti-Fracking and other environmental issues, so we are writing for him at this time. We are thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. and Mrs. Albert and Catherine Regenhard, Woodlawn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Marjorie McMeniman, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Emily Harting, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Cynthia Semenuk, Mount Holly, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Diane Weeks, Roulette, PA

Dear Members of the Delaware River Basin Commission: As a graduate engineer, I'm thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Wilfred Mackey, Huntington, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Jessica Richardson, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Fred Schloessinger, Great Neck, NY

Dear Members of the Delaware River Basin Commission: It is a positive move to take steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, these rules need to be air tight and at present they would allow a number of dangerous consequences. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. There is only one effective safeguard from the dangers of fracking and that is to protect communities from all possible effects of fracking. Thank you.

—Ms. Veronika Soul, New York, NY

Dear Members of the Delaware River Basin Commission: It is so difficult to undo pollution once it occurs. Please take every step to protect drinking water from fracking wastewater. These regulations need to be very strict, so as to ensure safe drinking water for generations to come. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Wendy Lott, Yorklyn, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Angela Elniski, Hamburg, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. Pedro L Porras, Jersey City, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Dannielle Edick, Mohawk, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. JASON SANDERS, STATEN ISLAND, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Nancy Rosman, Schwenksville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Thank you. But we need to go further. This should include a ban on all fracking waste material and infrastructure. As the rules are currently written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Elizabeth Keefe, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —Mrs. Andrea Zinn, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Matthew Vallon, Princeton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Weinreb, NYC, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Julie Romano, Oceanside, NY

Dear Members of the Delaware River Basin Commission: This is not an automated or spurious email. I have read and support the points raised by the NRDC and outlined below. Many thanks, -Chris I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Chris Gardner, London, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Mary Hostak, East Rutherford, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. We've all seen the earthquake damage that fracking has caused out west. New York and Pennsylvania sit on a fault line. Do we want an earthquake in our own backyard? I highly commend you on the fracking ban in place. But storing the waste from fracking is a danger to our drinking water and farmland. The monetary compensation from fracking companies to store their waste is not going to pay for the toxic drinking water we could end up with. Our children would be at the highest risk from contamination. Please ban all fracking activities in the Delaware River Basin. Storage is not an option. Thank you.

—Ms Mary C. Cichon, Angola, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. —Dr. Irene Kaminsky, New York, NY

Dear Members of the Delaware River Basin Commission: It gives me some relief to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. While your recently released draft regulations are an important step in the right direction, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. They could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. Fracking needs to be prevented everywhere. It cannot be pushed off as someone else's issue. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Annette Guarrasi, Scarsdale, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Andrew Astalos, Freehold, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Ilse Spiegel, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you. #racingextinction #actonclimate #climateaction #animalactivist #animaladvocate #animallover I request you all to help the future of America and the generations ahead for they too will need good quality water to sustain and thrive in the future. With fracking in place, water sheds can become contaminated and be a blatant obvious reservoir for disease causing agents and microbes. I humbly request you all to help in preventing the same. The present office bearers of our country do not realize nor wish to accept the severity of this dire situation. If drastic measures are not met to protect our lands, we and the future of this country will be in severe peril. So much hinges on what you all say and decide so please do not take this lightly in the least bit.

—Mr. Rahul Iyer, East Hills, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Carole Katz, Somers, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Bruce Greene, Hallstead, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Roger Hollander, Sewickley, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Brian Murray, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Sholtez, Derby, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Sole Marittimi, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Anne Wolf, Ridgewood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Julia & Ronald H. Tedeschi, North Massapequa, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. —Mrs. Susan Stone, Great Neck, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Rev. Susan Bassik, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Eileen Culkin, Saint James, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Idan Neev, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Cherie Ingraham, Brewster, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Gail Caiola, Frankfort, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. elyse brows, West Hempstead, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. John Cooper, Lewisburg, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Ruppenthal, Webster, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Cyrille P, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to FULLY PROTECT the Delaware River Basin and the drinking water of 15 million people from the fully murderous and destructive dangers of ANY and ALL fracking. Your recently released draft regulations are an important step in the right direction. However, as you know, these rules DO NOT go far enough. As written, they would open the watershed to the storage, treatment, and disposal of poisoned and contaminated fracking wastewater. And they would allow companies to draw freshwater from the watershed for use in fracking elsewhere. This is NOT VIABLE. THIS WILL NOT DO -- we need regulations that permanently ban ALL fracking and protect the watershed and surrounding communities from all fracking-related activities. NO drilling, no fracking waste, and NO water withdrawals can ever be allowed in the watershed! I, along with millions of other concerned citizens statewide and nationwide, urge you to pursue the only viable and workable option: a FULL BAN on fracking and fracking-related activities to keep our health, water, and communities alive, thriving and safe from destruction, illness, contamination and harm. Thank you, in advance, for your advocacy and for being aware, conscious, logical and forward-thinking.

—Ms. A.L. Steiner, Cornwallville, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Joyce Crowley, Morton, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. Robert Teitelbaum, Ithaca, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. The best way to do that is to eliminate all drilling and fracking activities on the Delaware River Basin itself. In addition, there should also be a ban on dumping wastewater from fracking activities taking place in other places into the Delaware River Basin. In addition, there should be no water removal whatsoever from the Delaware River or any of its tributaries to conduct fracking in other places. Fracking not only is damaging to the Delaware River Watershed--it also contributes to human-caused climate change. Thank you.

—Mr. Dennis Wingle, Shoemakersville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Matthew Green, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. William Wekselman, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Susan Schulz, New York, NY

Dear Members of the Delaware River Basin Commission: COMMENT: We want to protect the Delaware River Basin. This is a time of extinction. This is a time of pollution on land and sea. For the sake of all of us, humans, animals, and plants, protect the Delaware River Basin with all the might you can. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Dr. Lisa Woodside, Wallingford, PA

Dear Members of the Delaware River Basin Commission: Believe it or not, IMMEDIATE GRATIFICATION by means of corporate handouts, does not always make you win in the end. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Charlene Rush, Allison Park, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. T. F., New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. —Ms. Andrea Strout, Doylestown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert J. Schuessler, Tonawanda, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Pamela Fleming, Wexford, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Matthew Franck, Highland Park, NJ

To the Members of the Delaware River Basin Commission: Thank you for your recent draft regulations. But as they are, I am afraid they could open the Delaware watershed to storage, treatment, or disposal of contaminated fracking wastewater. They also allow companies to draw freshwater from the watershed for use in fracking elsewhere. Please pursue a FULL BAN on fracking and fracking-related activities to keep our water safe from harm. Thank you.

—Loren Amsden, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —Mr. Andre Bernard, Brookside, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Rhonda Kane, Lewes, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Silvana Tropea, Forest Hills, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Helen Goodspeed, White plains, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—mr lechner lechner, N. bellmore, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. Marc Dragish, Hammonton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. Ugh! This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Yolanda Stern Broad PhD, Indiana, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Pamela Ramsburg, West Chester, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Bruce Young, Middletown, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Michael Kirchner, Harrisburg, PA

Dear Members of the Delaware River Basin Commission: It is nice that you are thinking of banning fracking. However, if you allow in the name of alleged safety to promulgate rules on the withdrawal, storage, transfer and dispersal of already fracked water, what is the point? It becomes the same thing. And since there are no plans to Frack here right now anyway, what is the reality of such a devil's bargain? This is wrong. If fracking is not to be allowed in our watershed, and that makes the most sense if one thinks about health of water, air and people, then it should not be allowed anywhere, if we all know that argument ain't gonna fly anywhere....money talks and everything else....walks. But this idea? This is ludicrous indeed. Stop this piece of insanity. Do not go forward with thinking anything in this industry can be regulated into safety, especially with defunded, gutted and reviled environmental agencies. There is no thing as a safe pipeline. There is no such thing as a leak proof pipeline or well. And cracked and cracked rock underground does not play by any rules you can set up. Get humble. Stop this monstrosity. Now please.

—Mrs. Sharon Furlong, Feasterville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. I know you can do even better. Not much is more important than fresh water to the sustainability of the planet on which we all live. Thank you.

—Ms. greta Aul, Lancaster, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Wadyth Zamorano, Union, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Paul Kaufman, Bergenfield, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Kathleen Loncosky, Olean, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mrs. Clarice Glandon, Long Lake, NY

Dear Delaware River Basin Commission Members: I was very happy to learn that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. That said, I don't believe the recently released draft regulations go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. These are not risks we want to take -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Joshua Kneidl, New York, NY

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Ronald Ham, Albion, NY

Dear Members of the Delaware River Basin Commission: It's great to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. The recently released draft regulations are an important step in the right direction. But there's a long way to go yet before these vital public waters are protected. As currently written, the draft regulations could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. In addition, they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. To do this right, we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm.

—Mr. Don Robinson, Chester Springs, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. DIANE VEATH, Johnstown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. N. Dumser, Northport, NY

Dear Members of the Delaware River Basin Commission: Not partial, limited, or less than full permanent banning. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Howard J. Mead, Cinnaminson, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Marie Weinstein, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Marie Weinstein, Brooklyn, NY

As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! The job of our government is to protect the people. Your job as leaders of our government is therefore to ensure we are protected to the best of your knowledge and ability. You know the right thing to do to protect our people, and this is how you push the government that direction. I, along with thousands of other concerned constituents, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Marc Karasek, Media, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Tracey Mangus, Ford City, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Jill Berkowitz-Berliner, Mount Kisco, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Patricia Busener, Palenville, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Linda C. Murray, Mansfield, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms Joanne Redling, Little Ferry, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Lee MacKenn, Bloomingdale, NJ

Dear Members of the Delaware River Basin Commission: I'm very happy to hear that you are taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Please tighten the proposed regulation to completely protect the watershed. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you sincerely.

—Mrs. Janet and Joel Karp, Glenside, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Caroline Waterman, Albany, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Thank you. **FOSSIL FUELS = DEATH, AND ALL WHO CONTINUE TO PUSH THEM ARE MURDERERS!!**

—Mr. Paul Palla, Greencastle, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Peggy Costic, Long Valley, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Gregg Weatherby, Ithaca, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Nancy Garavuso, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. As Messers Christie & Murphy can attest to, as a resident of W. Milford, NJ, we realize better than most that the preservation of Watershed Land is vital, more so than the he lower tax rates that would come from development. Risking this environmental trust area for the sake of fracking profits is unacceptable to me, and should be to all of you. We need regulations that permanently ban fracking, to protect the watershed and surrounding communities from all fracking-related activities! No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Stephen Simpson, West Milford, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. s Silvia Rennie, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Joyce Conklin, Riverhead, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Jeanne Friedman, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Chris Scholl, Neptune, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Anna Engdahl, Hankins, NY

Dear Members of the Delaware River Basin Commission: I'm so happy to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not work in the long run -- we need regulations that ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you so much for your advocacy and your service .

—Reverend Elizabeth S. Frumin, Narberth, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mr. David Balfour, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, respectfully urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. REID READING, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Sharon Longyear, Yorktown Heights, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mary Ennis, Aldan, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Cathy Laughlin, New Castle, PA

Dear Members of the Delaware River Basin Commission: FRACKING must be banned and regulations must be put into place to protect our drinking water!! Thank you for the steps you are taking currently. The citizens of this country deserve good non-contaminated water. BUT ensure that OUR drinking water is not used for any fracking, for anything that will potentially contaminate our right to a good drinking water source. Millions of Americans are counting on regulations to be put into place for our future water drinking. Please enact a ban on fracking in the Delaware River Basin that fully protects our environment, climate and health. THANKS!!

—Darlene Janas, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm happy to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Williams, East Northport, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Ariel Holdsworth, Yonkers, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—MR > MR. & MRS. H. REVESZ, Cedar Grove, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Angela Leventis, Philipsburg, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities.
