Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Melanie Smith, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm glad to hear that you're taking steps to protect the Delaware River Basin from the dangers of fracking. However, I don't believe your recently released draft regulations go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. I urge you to pursue a full ban on fracking and fracking-related activities. Thank you.

—Mrs. Margaret Grubbs Jr., Newtown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Banning fracking must go all the way, not just part-way.

—Ms. Linda E. Macy, Hauppauge, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Gerson and Debbie T. Lesser, MD M.D., Bronx, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Douglas Williams, Schenectady, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Lynn Gale, Maplewood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Ms. Lynn Eskenazi, Lido Beach, NY

Dear Members of the Delaware River Basin Commission: As an avid hiker and individual who appreciates the drinking water of Rockland County NY, I am supportive of your work to protect the Delaware River Basin watershed. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—John Zazyczny, Nanuet, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Brandon Piereder, Albany, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. —Mr Donald Alund, Albany, NY

Dear Members of the Delaware River Basin Commission: How good to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Ruth K. Panella, Wilmington, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Phil Troutman, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Please protect our water and the environment and ban fracking. Thank you.

—Ms. Judy W. Fairless, Warren, NJ

Dear Members of the Delaware River Basin Commission: I'm very pleased to hear that the Commission is taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction, but I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. We need regulations that PERMANENTLY ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Christopher Fleck, Huntington, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Adrian Juarez, BUFFALO, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. —Mr. Jared Cornelia, Wilmington, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Pamela Scoville, Hewitt, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Teresa Eddy, Esq., East Nassau, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Richard Dudziak, Bayonne, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Evelyn Malone, Buffalo, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. T Wiecezak, New Hyde Park, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Susan Picard, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Noella Schum, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! —Miss Rachel Jacobs, West Chester, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Richard Staten, Newark, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Clark Jones, Bronx, NY

Dear Members of the Delaware River Basin Commission: I am pleased that you have taken the initial steps to protect the Delaware River Basin. However, I think you need to go further. The DRBC's draft regulations could open the Delaware River Basin watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Furthermore, they could allow companies to draw freshwater from the watershed for use in fracking elsewhere. I urge you to pursue a permanent and complete ban that fully protects our environment, climate, and health from all fracking-related activities. Thank you for your time and consideration to this important matter.

—Mr. Todd Kristel, Jenkintown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Christine Hunsinger, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Susan Boyd, Leonia, NJ

Dear Members of the Delaware River Basin Commission: Thank you all for your consideration of regulations to protect the health of our area's citizens. The Delaware River and its watersheds provide essential drinking water to millions. Fracking, in all of its permutations, threatens the health of us all. Banning fracking and all of its associated activities is the only long-term solution. Please consider our health, our children's health, and their children's health as you go forward. No fracking = healthy water for all. Thank you,

—Mr. David Rose, Huntingdon Valley, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Gary Oakes, Hockessin, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Mary Ferrigno, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Joshua Corris, Red Bank, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Andrea G. Eisenberg, NY, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Marjorie Berk, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Jill Strasburg, Cheektowaga, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Kathy Pippen, Columbus, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Patricia Austin, Pearl River, NY

Dear Members of the Delaware River Basin Commission: I am particularly fond of having drinking water that is not polluted, and doesn't have harmful chemicals in it. I'd love for that to be a permanent condition. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr John Hoff, New Oxford, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Kathy Ray, Albany, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Ms. Suzanne Ennis, East Setauket, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I live in Upstate New York where we have had a moratorium on fracking— we talked to people in Pennsylvania that have experienced the adverse effects. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Kathleen Barry, Syracuse, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Nathan Weida, New York City, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Denise Sandole, Union City, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Mark Ams, Meadville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Nancy Anderson, Lambertville, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr George Irwin, Wilmington, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Dagmar Degree, Cream Ridge, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Nancy Page, Upper St. Clair, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Christopher Fetta, Hicksville, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Ellen Bilofsky, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Sandy Brubaker, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Sean Gallagher, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Mindy Reznik, Oceanside, NY

To the Members of the Delaware River Basin Commission: I'm happy to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. But I'm concerned that your draft rules go far enough. They could allow the storage, treatment, and disposal of contaminated fracking wastewater; and they could allow companies to draw freshwater from the watershed for use in fracking elsewhere. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. Can you please address this issue. Thank you.

—Ms. Kathleen Williams, Great Barrington, MA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Peter Meccio, Yorktown Hgts, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Susan Hamann, Chester, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Bonnie Craig, Slippery Rock, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. letizia balsamo, perinaldo, PA

As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Leo Kucewicz, Phoenixville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mme. Margaret Neveu, Bourg des Comptes,

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Darcy Avolin, Freeport, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Yanira Ortiz, Newark, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Frank Trotta Ph.D., Lansdowne, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Amy Wolfthal, Croton On Hud, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I live near the Hudson River where General Electric dumped tons of toxic PCBs. The clean-up is not finished yet. There are still PCBs up and down the river. It is far easier to keep something clean to begin with, rather than to pay millions of dollars and threaten human life and wildlife after having released toxic waste into the environment. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Diana Praus, Menands, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. —Mr. Joseph Jones, Bronx, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Peggy Wissler, Suffern, NY

Dear Members of the Delaware River Basin Commission: I'm happy to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Matthias Hess, Lancaster, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Jennie Sabato, Somers Point, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jon Fields, Port Washington, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. —Mr Kyle Jones, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Kathleen Winkler, BROOKLYN, NY

Dear Members of the Delaware River Basin Commission: I hear that you drafted regulations to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. However, I don't feel these regulations are going to be effective in preventing all forms of fracking water contamination. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Jennifer Dimmig, Vincentown, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Mark Finkelstein, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—ms Glory A, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: Because I know that fracking is hazardous to the environment, and because people's lives have been ruined by companies that frack irresponsibly, I'm happy to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Kelly Doolittle, Locke, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Verity, North Bellmore, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Barbara Bryan, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Michael Zajac, Brick, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Daniel Max Behl, Glen Mills, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Anne Sharman, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mrs. Suzanne McCabe, Swoyersville, PA

Dear Members of the Delaware River Basin Commission: The environment is not an area to reduce regulations. Allowing fracking is just too risky in this area. Please protect the human race, it's water supplies and the wildlife that call this their home. We've done irreplaceable damage. It must stop before there is nothing left. Thank you.

—April Carone, Hampton Bays, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Robert Janusko, Bethlehem, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Margarita Munoz, Hillside, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. I believe that nothing short of a full ban on fracking will protect the people and animals of this state. I love this state. Our whole family loves to camp and fish, and this is our favorite state to do that in. As it is I always check to see if the water is flammable before hooking it up to our trailer. People living in a country such as ours should not have to do that. We, as a country, must stop destroying this earth and poisoning everything on it. Our president doesn't care about us. I hope you do. Thank you.

—Mrs. Donna Smith, Havertown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Jennifer Bulava, Hammonton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Fern Wachtel, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. —Mr Hans van Huijkelom, Audubon, PA

Dear Members of the Delaware River Basin Commission: I own a home in the beautiful woods walking distance from the Delaware Water Basin, and live in fear of the day that this special and pristine place is destroyed by the greed of those looking to over-exploit its resources. Thus, I was very happy hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Rachel Gordon, Dingmans Ferry, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Marilyn Schambach, Afton, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Lisa Stimpson, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you. P.S. In any case, we should not be building new infrastructure for fossil fuels. Rather switching to alternatives, so we add no more carbon to the atmosphere

—Susan Daum, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Audrey Newcomb, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Nancy Mooney, Huntington Station, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Marianne Montero, Bronx, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Rosemary Doheny, London,

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Judith Packer, Vestal, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Wozniak, Columbia, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. June Balish, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Lee Richman, Long Island City, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Anne Johnson, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mrs. Julia Leidy, Medford, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Arthur Hayner, Averill Park, NY

Dear Members of the Delaware River Basin Commission: I am happy to hear that you are taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I do not believe that those rules go far enough. As written, they could open the watershed to the storage, treatment and disposal of contaminated fracking wastewater. They could also allow companies to draw fresh water from the watershed for use in fracking elsewhere. This will not do. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water and communities safe from harm. Thank you.

—Ms. J Rigney, Newton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Susan Bokser, Morganville, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Trudy D. Gerlach, Wyalusing, PA

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Vigny Fong, Great Neck, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—MR JESSE DELLINGER, MOUNTJOY, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Nicole Bohlman, Medford, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—MR. Kenneth Roberts, Gettysburg, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. They could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do! There must be regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Poisoning the water creates a permanent problem to those who live downstream and depend on the Delaware Rive for drinking I want you to pursue the full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. John Aponick, Harrisburg, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Tara Kazak, Huntington, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. We the people and our families have a right to safe, unpolluted drinking water in PA; and we demand you uphold our rights as residents of PA. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Jerri Jarvis, Confluence, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Boguslaw Kulesza, Franklin Square, NY

Dear Members of the Delaware River Basin Commission: I'm thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. I'm writing to encourage you to broaden the terms of the regulations to ban all fracking-related activity as well such as the storage, treatment, and disposal of fracking wastewater. The use of our water for fracking elsewhere should be prohibited. Nothing short of regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities is acceptable. No drilling, no fracking waste, and no water withdrawals should be allowed in the Delaware basin. You are my elected representatives and as such, I urge you pursue a -full ban- on fracking and fracking-related activities and by-products. Protect the water upon which the health of your constituents, and all other life in our region, depends. Thank you for your actions on my behalf.

—Dr. Amy Love, Mount Laurel, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Kathi Thonet, Pittstown, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Linda Anderson, Laurelton, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Michelle Schmitt-DeBonis, Milltown, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Nadine Godwin, New York, NY

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Michael Bonifanti, New York, NY

Dear Members of the Delaware River Basin Commission: Please please do not allow fracking to pollute this important and vital natural resource. Clean water is a precious resource and becomes even more precious as population growth occurs. Let's switch to clean energy as soon as possible making polluting fracking unnecessary. Get smart about the environment and make the world a better place for everyone on earth. It can be accomplished by just taking one step at a time - a step in the right direction for a clean environment which we will bequest to our future generations. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—mr. skip drinkwater, malvern, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Edna Wright Olsson, Bellerose, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr Ron Turner, Sicklerville, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Margaret S. Dixon, Bethlehem, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Uyen-Chi Nguyen, Morris Plains, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Joshua Wallman, NYC, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Olga Kalfopoulou, Athens, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Ken Ward, Gloversville, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Noah Plofker, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Walter Skelly, Brentwood, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Healthy, viable watersheds are treasures and are of critical importance to the well-being of the environment that is within the drainage and everything that resides within that drainage. Your proposed regulations must consider the value of the existing water quality and what it would cost to resolve the toxins that loose regulations would instigate, if in fact you could. Those of us that reside with the Delaware River Basin are very protective of our extraordinary water quality, as should any member on the Commission. We will not stand by and have that water quality jeopardized, especially given the overwhelming support the entire region has shown for a completely FRACK-FREE watershed. Nothing less will do. ALL WATER IS SOMETHING'S DRINKING WATER!!! Thank you.

—Ms. Naomi Zucher, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. m toro, brooklyn, NY

Dear Members of the Delaware River Basin Commission: I am relieved to hear that you are taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I do not believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. In addition, they could allow companies to draw freshwater from the watershed for use in fracking elsewhere. This cannot be permitted. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Matthew Stranick, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Thomas Higgins, Newtown Sq, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Luigi Iannucci, Westbury, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Lewis, Delanco, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Nicole Kachadoorian, Ridgefield Park, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, these rules go far enough to effectively protect our drinking water. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Mark Sandstrom, Jersey City, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Ben & Karen Gossard, Perkasio, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mrs. Serap Yontar, Hamburg, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Andrew Tomasuolo, Staten Island, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Nadine Sapirman, Hillsborough, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. John Klacik, Sea Isle City, NJ

Dear Members of the Delaware River Basin Commission: Over the past decade, as fracking and its pros and cons have come increasingly into the realm of public debate I have been astounded at the fact that so little attention has been paid to the potential dangers to our water supply. I simply do not understand why we human beings always seem to be prepared to spend money coping with emergencies after the fact instead of giving appropriate consideration to ALL potential problems BEFORE pursuing a course of action that might affect our daily lives. How anyone can think that "cheap energy" (and that is debatable!) can possibly be considered to be of equal - let alone greater - importance than a regular supply of clean drinking water is beyond my comprehension. I'm absolutely delighted to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Paul Maderson, Quakertown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. John Young, Pocono Manor, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Paul Brown, Syracuse, NY, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. bob higinson, Riverhead, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Michelle Barron, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I am pleased that you are taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of hydraulic fracturing. While your recently released draft regulations are an important step in the right direction, I fear that these rules do not go far enough. As written, the rules could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. The rules also could allow companies to draw freshwater from the watershed for use in fracking elsewhere. I believe that regulations are needed to permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Wasilewski, Wilkes Barre, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Julie Schenk, Valencia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Holly Lattime, Princeton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss GAIL CIRONE, Spring Valley, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Cullen Donahue, Albany, NY

Dear Members of the Delaware River Basin Commission: I have lived along the Delaware River since 1962. so I'm thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. My well water was used as a control in a study of the effects of fracking on well water. Bad news. Bad chemicals the closer to the fracked area. Thank you for the regulations you propose, but, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Elizabeth Warner, EQUINUNK, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Celene Given, Trenton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Ernest R. Needham Jr., Newton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Linda Falco, Manlius, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Judith McGovern, Quakertown, PA

Dear Members of the Delaware River Basin Commission: I'm glad to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Once the watershed is contaminated, it will ruin the drinking water of more than 15 million Americans. We must protect it. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Carol Angle, Summit, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. James Aquino, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Linda Bescrypt, Langhorne, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mr. Tom Gauntt, Bensalem, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you for your consideration.

—Mr. Mark Gorsetman, Whitestone, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Douglas Langenau, Salt Point, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. It appears to me, that as soon as the watershed is contaminated by the above practices, it shall be opened up to fracking there as well. We must preserve our drinking water as long as possible. It is a crime against nature (sin against God) to permanently destroy our water sources. Biblically, we know that all the waters shall be one day poisoned, but why should we give into that future event on our watch? This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Sanders, Rocky Point, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Jill Nicholas, Penfield, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Martha Lynch, Staten Island, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Christopher Carbone, Gibbsboro, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Diane Bugliarelli, Carmel, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—James Maxwell, Ardsley, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Also please encourage your states to set truthful, clear, full disclosure of all substances put into all mining elements, substances used and put into the earth and all waste that comes out of their wells, holes, leaked, the surrounding overland and underground water. Perhaps when society and the government realize the toxins released, leaked, filtered or distributed into their water they will realize the exponential increased health costs! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Mary E. King, Hillsdale, NY

No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. S. Soto, Union City, NJ

Dear Members of the Delaware River Basin Commission: As a resident of the Delaware Valley living within 100 yards of the river I am very glad that you're taking steps to protect the River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Tom Manning, Stockton, NJ

Dear Members of the Delaware River Basin Commission: I'm pleased that you're taking steps to protect the Delaware River Basin, trout fishing in that basin, and the drinking water of 15 million people from fracking. Your draft regulations are a great step in the right direction, but they don't go far enough. There are gaps in the regulations as written that could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. They could also let companies draw freshwater from the watershed for use in fracking elsewhere. This is a big problem. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thanks.

—Mr. Scott Loveland, Wappingers FL, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —8452233043 Christina Di Marco, Hopewell Jct., NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Audrey Kopecky, Easton, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Victor Sytzko, Fair Lawn, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Richard Alloway, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: Thank you for taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. As a scientist I understand the potential dangers posed to the basin. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. WILLIAM LOFTUS, Vero Beach, FL

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Many of these chemicals are "protected" as trade secrets, so we do not understand their toxicities and long term impact on the health of the public. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr Lori Spangler, Churchville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mary Crea, Clarksville, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. We **MUST** be proactive, by not letting this dangerous practice kill the drinking water of **THOUSANDS** of taxpayers, and then trying to clean the damage up. Please invest your votes and my tax dollars to green alternative energy businesses. **WE** need to **LEAD** the world. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Maripat S, Woodcliff Lake, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Phil Dumont, Cranbury, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Kathie Welch, , NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Wendy DeMarzo, Fairport, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Madeline Romaine, Saddle Brook, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater.
