

## Raymond Irrera Associates Architects, P.C.

Fracking anywhere in the Delaware River Basin will inevitably poison the river and its feeder streams, imperiling the health and well-being of our populations all the way down to NYC, where we drink the water emanating from the DRB, to say nothing of destroying the priceless natural environment of the Catskills, and the recreational and restorative values they provide, as well as the economic enterprises serving those values, upon which so many livelihoods depend.

**DON'T ALLOW FRACKING THE THE DRB; WE CAN'T DRINK OIL FOR OUR  
SUSTENANCE!!!**
