

# Tammy Belinsky

Your proposed regulations make water less available to public users.

Your proposed regulations make water pollution by the fracking industry more likely and easier to pollute.

Gas does not sustain life.

Water sustains life.

If you manage to have grandchildren that are not mentally challenged, then what will they think of you? You have a chance to stop the madness. You could be part of the solution instead of part of the problem. Instead you are feeding the greed that is killing life on earth.

May you and your offspring get everything they deserve from the decisions you make that leave the planet uninhabitable.

I suspect that only staff will read this, and not the actual commission members. This message is directed at you, too. What the hell is it that your children think you do for a living? Do they think you have something to do with environmental protection? If they do, you are lying to them. It is not too late for you to blow the whistle. Contact Public Employees for Environmental Responsibility and they can help you blow the whistle and protect yourself.
