

Rebekah Creshkoff

My community is located on the Upper Delaware River. Many of us make our livelihoods courtesy of its pristine waters. Many others have ties to cities that draw on the Delaware for drinking water. Millions of people in our region depend on the river's extraordinary water quality. Please preserve this rare and precious resource by prohibiting both 1) the dumping of toxic and radioactive waster in the Delaware River watershed, and 2) the withdrawal of fresh water from the Delaware River watershed for fracking activities elsewhere.
