

Judith Fletcher

I want to see the DRBC do everything that it can to ban fracking and save the Delaware River and its basin.

I see the Delaware as a part of my heritage, as an important part of our national heritage. As one of the last pristine rivers on earth, a river that provides drinking water for millions of people and serves as an important habitat for many species, it must be protected to the greatest extent possible.

The proposed regulations do not fully protect the Delaware Basin ecosystem and communities from the impact of fracking. In addition to banning fracking, they must forbid the exportation of fracking wastewater from the Basin to fracking elsewhere and also forbid the importation of wastewater for treatment into the Basin.

Thank you!
