

Delaware River Shad Fishermans Assoc.

This the only river on the east coast without a dam and is native to the American Shad, something that is most sought after on the east coast. We the people have fought hard and true to keep the Delaware River clean for water supply and clean for the migrating fishes that use this river. we waited long for it's present condition and now they #####-##### want to dirty and pollute our river for profit. You people who sit on the Agency are to keep the best interests for the people and the water.. DON'T STOP NOW.. Say NOOOO to Fracking in the water shed area of the Delaware River.. G.E.M.Sr.
