

Gail Brunner

To the Honorable Members of the DRBC, This is my last opportunity as a public human being to comment to the DRBC to fight for our lives about fracking as today is March 30 the last day the public has an opportunity to comment. I am asking that you please do not allow any fracking, fracking related fluids imported or exporting any water for fracking elsewhere in this precious Delaware basin. As a local resident I ask that you not listen to the private oil and gas industries that are only interested in making a profit. Please consider the health of all the residents and folks that work in this area and vote NO for fracking. Thank you and have a good day.
