

Ita Jeanette Friedman Sieradski

I live with a well. I already have three consecutive filters on the house which filters out more filth and pollution than my filters in New Jersey ever did and they have to be changed MONTHLY. And you intend to poison us altogether. SO... No to fracking. no no no no no no no.

I know there is poison in our water already, my white dogs turned horribly brown and red when we moved here. CLEAN UP THE FILTH. DON'T MAKE IT WORSE. MONEY IS NOT EVERYTHING. Clean air and water matter. Maybe not to gazillionaires, because you can go and buy whatever you need, clean oxygen tanks, clean water. The rest of us you want dead. We get it.
