84 1 many of them in Philadelphia. 2 And this energy source 3 that we're going through all of 4 this for is completely unnecessary. We have a lot of 5 other opportunities for energy. 6 7 And we have a lot of other opportunities for a healthy way 8 9 to live and use our water. 10 So I'm not going to use 11 all of my time, so that others 12 can speak. I appreciate the 13 time you've given us. And I 14 urge you to make the right 15 choice and give a regenerative 16 energy plan a chance. Thank 17 you. 18 HEARING OFFICER: 19 The next three speakers 20 would be Joan Farb, then 2.1 Stephanie Herron, and then 22 Nancy Harkins. Your name is 23 Joan Farb? 24 MS. FARB: 25 Yes.

	85
1	HEARING OFFICER:
2	Ms. Farb, please.
3	MS. FARB:
4	I'm Joan Farb. I want
5	to thank the Commission for
6	having these hearings in order
7	that residents like myself can
8	speak about the proposed
9	regulations for 2018.
10	It is imperative that
11	there is a complete and
12	permanent ban on natural gas
13	drilling, and fracking, and all
14	related activities, which
15	include wastewater processing
16	and discharges from fracking
17	and water withdrawals from
18	drilling and fracking.
19	Why a ban? Because
20	there are many, many
21	significant scientific studies
22	showing detrimental impacts to
23	public health and to the
24	environment from these
25	processes.

	86
1	For example, the
2	Concerned Health Professionals
3	from New York and the
4	Physicians for Social
5	Responsibility assessed 685
6	peer-reviewed papers on gas
7	drilling and fracking. They
8	found that the majority of
9	these studies shows substantial
10	correlation between fracking
11	and illnesses such as cancer
12	and also pollution in air and
13	water.
14	Also, fracking has used
15	5 million to 10 million gallons
16	of water per well, and
17	presently, there is a trend to
18	an increase to 10 to 20
19	million.
20	This tremendous
21	withdrawal of water would go
22	against the DRBC water code
23	policy of protection and
24	preservation that states the
25	waters of the Delaware River

Thus DRBC, don't let the

25

1 well go dry for 17 million 2 people in the Delaware River 3 Basin. Ban fracking completely and all related activities. 4 5 Thank you. HEARING OFFICER:

> Stephanie Herron will be next. And then Nancy Harkins. And then Attorney Kim Ong. And let's see. Ms. Herron, when you are ready.

MS. HERRON:

Okay. My name is Stephanie Herron. I'm with the Delaware Chapter of the Sierra Club. I am here with some of our volunteers to testify on behalf of our over 8,000 members in the state of Delaware.

First off, I want to thank you and thank the DRBC for allowing us this opportunity to comment. I also would like to thank the DRBC
