

## Taylor Sinkiewicz

Fracking needs to be banned completely in the Delaware River Basin. PERIOD, THE END. It makes ABSOLUTELY NO SENSE- to ban fracking in the basin yet allow toxic waste water to be dumped as well as take water from basin to use for fracked gas projects. Fracking produces methane. A greenhouse gas. A gas that is 86x more toxic over a 20 year period compares to CO2. Millions of gallons of water are objected into the Earth for EACH WELL. 90% of that water does not come back. To the surface, and the water that does is contaminated and polluted. WHAT A WASTE OF WATER. WE CANNOT AFFORD TO BE WASTING WATER SO RECKLESSLY. We cannot afford to be contaminating our environments, our school grounds, our towns, with DAMAGING CHEMICALS voluntarily. We must not kick out more wildlife from their rightful habitats for our own disgusting greed. Please ban all fracking related activities to the Delaware river basin. Do the right thing. BE A MORAL HUMAN WHOMEVER IS READING THIS. Wake the fuck up.
