

Donny Hicks

I live in the Delaware Basin and I am 18 years old. I would strongly support the ban on fracking in the Delaware River Basin due to the devastating impact on not only the people that occupy this region and are supplied with the water, but the also the wildlife and ecosystems. Not only are habitats being destroyed from on-spot fracking, but ecosystems are being destroyed by the harmful unspecified chemicals used in the fluid, which leaches into ground water that many organisms rely on. Would you drink polluted water for the economic benefit of someone else?
