

Andree Larsen

Do not allow any fracking waste water into the DRB. Do not allow fracking companies to use water from the DRB. I lived in Lambertville NJ for 15 years & remember how polluted the Delaware River once was. We started a SHAD FEST there to celebrate the return of the Shad to a clean river after years of pollution. Fracking is dangerous & can cause earthquakes,as it has in many of the states that allow it.Please don't pollute the beautiful Delaware River again.
