

Greg Young

The Delaware river is America's river- it is part of our national heritage and it is one of the last pristine rivers on earth.

It provides 5% of America's drinking water.

But it's not just people down river in New York Philadelphia and southern New Jersey that need fracking to end.

This fracking ban is for all of us- all Americans- it is our responsibility to protect this national treasure!

the proposed regulations do not fully protect communities from the impact fracking has they still allow for the exportation of fracking wastewater from the Basin to fracking elsewhere AND the importation of wastewater for treatment into the Basin.

It should ALL be banned!
