

Tom Noble

Dear Commission,

I write to oppose the Commission's proposal that effectively bans natural gas development in the Delaware River Basin region.

Please also consider the fact that increased natural gas access in the U.S. has helped lower our nation's carbon emissions. We lead all industrialized nations in carbon reduction---because of natural gas made available by hydraulic fracturing.

The federal government has rightly begun to limit unnecessary regulations. The DBRC should follow this lead, not impose new, unneeded restrictions.

I request that the Commission withdraw its new draft rule and revise to support, not impede, American energy development. Thank you for including my views in your review of this issue.

Sincerely,
Tom Noble
