

## Luana Lewis

It would be madness to allow fracking, disposal of fracking waste, or use of water for fracking, anywhere near the Delaware watershed or any other watershed with an impact on New York City drinking water or other drinking water having an impact on human health. The potential for catastrophic harm to millions of people in the New York City and Metropolitan NYC area is great.

I urge you to ban fracking practices of any kind in connection with watersheds affecting the Delaware watershed and other watersheds affecting drinking water for residents of New York, New Jersey, Pennsylvania, and Delaware. Thank you for your attention to these urgent concerns.- Luana Lewis
