

## David Bond

I am writing to support the commission's proposal to protect our natural resources by prohibiting hydraulic fracturing in the Delaware River Basin, but I urge you to strengthen regulations that would let drillers withdraw millions of gallons from our waters and send fracking wastewater here for treatment.

Also, am very concerned our regulations do now spell out how we would be protected from low flows and high temperatures that could result if drillers were allowed to tap our streams for hydraulic fracturing

Can you put in place sound inspection and monitoring protocols

As an angler and citizen concerned with our environment , I am concerned with responsible oversight of this entrenched and influential energy industry.

Thank you for your thorough study of this issue and consideration of my feedback. We need to protect our clean water, trout habitat and especially our precious Delaware River basin

Sincerely

David Bond
