

# Rebecca Canright

Hello there.

As a college student and concerned citizen I ask FERC to consider the following suggestions. These will protect and safeguard our communities and environment from harm, and will ensure the health and prosperity of both wild ecosystems and human communities in our area. I support strongly investing in renewable energy, which creates jobs and keeps our air and water clean, Additionally, please consider the following respectful suggestions:

I believe that FERC Must Prohibit the Practice of Hiring Third-Party Consultants to Assist in the FERC Review Process who Have Any Business Contracts (Past, Present or Future) with a Pipeline Company Seeking FERC Approval, and Must Prohibit FERC Commissioners or FERC Staff from Working on or Deciding upon Any Pipeline or Infrastructure Project in which They or a Family Member Have a Direct or Indirect Financial or Employment Interest.

7) FERC Must End the Practice of Using Segmentation, Allowing Pipeline Companies to Break Up Projects into Smaller Segments in Order to Undermine a Full and Accurate Review of Community and Environmental Impacts.

8) FERC Must Commit to a Full and Fair Implementation of the National Environmental Policy Act, Including Full and Fair Evaluation of Climate Change Impacts; Induced Fracking/Drilling Operations; Costs of Construction, Operation and Maintenance (not Just Benefits); Health and Safety Impacts; the Full Array of Community, Business and Environmental Impacts that Will Result; and that All Inaccurate, Missing, False or Misleading Data and/or Information Identified by FERC and/or Public Commenters Are Fully, Completely and Accurately Addressed.

Thanks,  
Rebecca
