I am writing today to urge you to,

Ban fracking in the Delaware River Basin.

Ban fracking waste transport, treatment, and disposal in the Delaware River Basin and to not permit Delaware River Water to be used for fracking.

Here is a link to The Compendium of Scientific, Medical, and Media Findings Demonstrating Risks and Harms of Fracking(the Compendium) is a fully referenced compilation of the evidence outlining the risks and harms of fracking.

<http://concernedhealthny.org/Compendium/>

"The Compendium is organized to be accessible to public officials, researchers, journalists, and the public at large. In addition, the Compendium is complemented by a fully searchable, near-exhaustive citation database of peer-reviewed journal articles pertaining to shale gas and oil extraction, the Repository for Oil and Gas Energy Research, that was developed by PSE Healthy Energy and which is housed on its website (<https://www.psehealthyenergy.org/our-work/shale-gas-research-library/>).

For this fifth edition of the Compendium, as prior ones, we collected and compiled findings from three sources: articles from peer-reviewed medical or scientific journals; investigative reports by journalists; and reports from, or commissioned by, government agencies. Peer-reviewed articles were identified through databases such as PubMed and Web of Science, and from within the PSE Healthy Energy database. Our entries briefly describe studies that document harm, or risk of harm, associated with fracking and summarize the principal findings.

The studies and investigations referenced in the dated entries catalogued in Compilation of Studies & Findings are current through December 2017."

Thank you,  
Renee Vogelsang
