

Sarah Gooderham

I am a concerned citizen who urges the DRBC to halt the proposal allowing the disposal of fracking wastewater within the Delaware River watershed and/ or withdraws of water from our watershed to be used in the process of fracking elsewhere. I find this to be simply unacceptable. It makes no sense to ban fracking but allow for the contamination of our water from fracking waste discharges and the depletion of our water supply for fracking. Since the regulations are just a draft, I urge the commission to vote against this proposal. Fracking waste has no place in a communal resource such as the Delaware River, a body of water upon which countless rely for clean drinking water. Additionally, I urge you to put a ban on ALL fracking activities. The continued prosperity of our region will be impossible if fracking is allowed; please ban it!
