

Valerie Knisley

I am opposed to ALL fracking, discharge of fracking wastewater, or withdrawal of water for fracking use here or elsewhere from the Delaware River Basin (DRB). Our states, nation, and world cannot continue to ASSUME that the environment can recover from the ABUSE we thrust upon it. FRACKING is abuse of the environment on so many levels. It affects our family's and our Damascus, PA community's enjoyment of this beautiful and thus far relatively pristine area. The GREATER GOOD is far more important than the small financial gain stolen from the land if fracking rights are sold. Do not allow ANY entity, drilling-related or otherwise, to legally manipulate their way to circumvent fracking ban laws either. That is politics in its worst form. Please do your job and protect our waterways, well water, and land.
