Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Gayle Stauffer, Lititz, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Michelle Dugan, Upper Darby, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Raja Shekhar Shekhar Chava, Bethel Park, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Anne-Marie Kunzler, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ronna Schuller, Merion Station, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Samuel Eastman, Seven Fields, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. doug sunday, Pine Grove Mills, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Denisel Mensinger-Campbell, Glen Rock, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Michele Amendolari, Syosset, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Kimberly Mullins, Newark, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you. Think of legacy instead of focusing on profit.

—Allison Nel-Boland, Queens, NY

Dear Members of the Delaware River Basin Commission: The Delaware River Basin is absolutely crucial to have safe, clean water for communities in New York State. We must keep this water pristine and not jeopardize it with any fracking-related activities (drilling, storage of waste water, drawing of fresh water for fracking) whatsoever. Consequently, I'm so thrilled to hear that you are taking the first steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking activities. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Look to what has happened in our neighbor state, Pennsylvania, and the damage fracking has done to drinking water in communities and the environment because of heavy trucking equipment. Many people have been harmed. As written, the proposed rules could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to make permanent the New York State moratorium on fracking by pursuing a full regulatory ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Madonna Starr, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Karen Miller, Kingston, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Stephanie Seymour, Ringwood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Michael A. Lindner, Port Washington, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Sr. M Doretta Cornell, Hawthorne, NY

Dear Members of the Delaware River Basin Commission: here is a polite reminder about what a democracy is about. "THE LIBERTY OF A DEMOCRACY IS NOT SAFE IF THE PEOPLE TOLERATE THE GROWTH OF PRIVATE POWER TO A POINT WHERE IT COMES STRONGER THAN THEIR DEMOCRATIC STATE ITSELF. THAT, IN ITS ESSENCE IS FASCISM-OWNERSHIP OF GOVERNMENT BY AN INDIVIDUAL OR BY A GROUP." FDR Do I really have to ask or beg an elected official for the right to drink clean water? please do not say this is the best country! please do not say the military fights for our freedom! how stupid do elected officials think voters are? I guess the goal of cutting education spending will help create stupid people who will work for crumbs! again. that is not a democracy nor is it the best country in the world!

—Ms. Payje McGonigle, Susquehanna, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Arnold Torchin, Rockaway Park, NY

Dear Members of the Delaware River Basin Commission: Thank you for taking critically important steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction, but they could still allow for the storage, treatment, and disposal of contaminated fracking wastewater. And companies could use the basin's waters for fracking activity elsewhere. New York State residents need stronger regulations--regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I urge you to protect our environment and our livelihoods by fighting for a full ban on fracking and fracking-related activities, a ban that would keep our health, water, and communities safe from harm. Thank you.

—Dr. Barbara Lynch, Ithaca, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —Ms Joanne Rogers, Marcellus, NY

Dear Members of the Delaware River Basin Commission: I hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. **IT IS TIME TO DO THIS!!!!** Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Get off your backsides to protect American citizens!

—Didi Magnin, Schenectady, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Joseph Aiello, Yonkers, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Florence McEvoy, West Babylon, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Ela E, Bryn Mawr, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Eugenie Von Poppe, Honesdale, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —p Schwarlander, Syracuse, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you. Fracking is a real danger to citizens! I can see the Delaware River from my sidewalk and enjoy kayaking on it. Sadly, the Trenton Water Works cannot make its waters safe for us to drink. Let's not let the river contribute to fracking in any way.

—Ms. Karen Du Mars, Trenton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Shirley Brown, Trumansburg, NY

Dear Members of the Delaware River Basin Commission: The one insane species in the known universe should act now if it does not wish to destroy our one and only home planet. It boggles the mind to contemplate how strenuously the concerned citizen must continually beg and plead for an end to atrocities such as "fracking", pollution and climate change in general, and hideous phenomena such as human-caused species extinctions and cruelty to individual non-human beings. Why has "Save the Whale" become a mocking catch-phrase? Where is the superiority in being willing to kill all that there is around us? A far nobler ambition would be for us to self-destruct and allow the beautiful, innocent, good species to continue to cooperate with each other as they have always done, even as we stupidly ignored their example. -----

I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —Mrs. Angela Dupin, SCOTIA, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. B Daniels, Milford, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Antonia von Zuben, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Shirley Drake Byers, Broadalbin, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Anne Warren, Staten Island, NY

Dear Members of the Delaware River Basin Commission: Thank you for taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I think these rules do not go far enough. As written, they could leave the watershed open to the storage, treatment, and disposal of contaminated fracking wastewater. They also could allow companies to draw freshwater from the watershed for use in fracking elsewhere. This concerns me -- we need regulations that permanently ban fracking and protect this precious watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Mary Rosenstein, Clifton Park, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Arthur C. Wolff, Saranac Lake, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Daryl Denning, Corning, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Dorene Hyman, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! —Mrs. Mrs Mary Gryzniec, Plymouth, PA

RE: Concerned citizen in support of a full ban on fracking and all fracking related activities in the area of the Delaware River Basin. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Tracy Wager, Cragsmoor, NY

Dear Members of the Delaware River Basin Commission: One big reason I live in New York state is New York's position on fracking. To my mind Pennsylvania has recklessly been on the wrong side of history with regard to fracking. Thank you for taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your draft regs could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I say No to this. There is nothing more precious than our drinking water. How companies have gotten away with not stating what chemicals they use in fracking is one of the biggest crimes of the 20th-21st centuries. Money, money, money. Pennsylvania, I hope you are saving a pile of it for when the true damages from fracking come to light. Whatever you save it will not be enough to remediate the irremediable. NY, please stand firm. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed. I urge you to impose a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Marilyn Beckley, Syracuse, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—MS Martha Lain, Westtown, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Melissa Travers, Princetown, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Rikki Kaplan, Scarsdale, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Peggy Sutton, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Eileen Schram, West Paterson, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Sister Deb Hughes, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —ms Pamela Crouse-Haas, Haddon Heights, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Carlos Ramos, Queens, NY

Dear Members of the DRBC: We, the public, are relying on you to keep us safe from fracking chemicals in our water sources. The draft regulations are a good start, but WE NEED MORE. The public, we the people, the people who drink and bathe in this water, the babies drinking it, the wildlife living in and near it, need to be absolutely protected, without fear of contamination. Only a COMPLETE FRACKING BAN can achieve this. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Chris Paveglio, State College, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. What do we gain by mining resources at the expense of more important resources, such as drinking water, and safe recreation areas! Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Elizabeth Conte, Liverpool, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Sarah Barr, Wynnewood, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Joyce Bryk, Ros.Hts, NY

—Teresa Allen, Curwensville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. I spent my career in the hazardous waste field, and we found out in the 90's that fracking was dangerous and opened fractures into preciously confined drinking water aquifers in unexpected and untraceable patterns. We quickly ceased using this method. We should learn from our past mistakes. Thank you, Sue

—Susan Schneck, Morrisville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. We absolutely need a full ban on fracking. Please don't just think about this. Do this. Don't let your legacy be that you were a party to allowing the poisoning of our precious water supply! Thank you.

—Ms. Laura Collier, Plattsburgh, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Jane Froman, Northport, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Elise Phillips Margulis, Livingston, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mr. Kenneth Walsh, Dickson City, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Kenneth Walsh, Dickson City, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr David Morelli, Chewick, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Jeanne Rothwarf, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Carl Oerke Jr, River Edge, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Liana Volpe, West Orange, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Judith Bohne, Womelsdorf, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Let us also note the beauty of the Delaware River basin. I love this river like my lifeblood. To harm that river would be a crime against nature, as well as against humanity. Thank you.

—Ms. Roberta Healey, Norwich, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Gretchen Avery, Union Springs, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This is wholly insufficient -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Don't poison the people who live and raise their families there. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—James Michael Roberts, Montclair, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. Don't Let That Happen! This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. This Is Crucially Important! Your constituents and their descendants Thank you.

—Ms Linda Forman, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Debra Wolinsky, Highlands, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Elaine Adler, West Chester, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Chris Melograna, Collegeville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Sharon Kasow, Middletown, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Kimberly Goode, Laurelton, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Judy Springer, West Chester, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mrs Christine Mills, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. & Mrs. John A. Brendel, Lock Haven, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Rolf Lotz, Mifflintown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —Ms. Elise Aronov, Montclair, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Alex Sponza, Covington Township,, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Helen Lowe, NYC, NY

Dear Members of the Delaware River Basin Commission: I am encouraged to learn that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. BUT I don't believe these rules go far enough. As written, these rules could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This isn't good enough; remember -- this is not about regulation as much as it is about protection. We need to protect the watershed and surrounding communities from all fracking-related activities, so regulation should start from this principle: protection. So, we need regulations that permanently ban fracking; no drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Commissions such as the DRBC owe their first responsibility to protecting the health of citizens by ensuring the quality and availability of the water supply. It is crucial that you strengthen the protection of the public resource by adopting safe and sensible policies that disregard pressure from "industry" sources. **NO DRILLING, NO FRACKING WASTE, and NO WATER WITHDRAWALS!** I am counting on you to represent the public and ensure our safety. Thank you.

—Dr. W.J. Zack, Chestertown, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Nick Viggiano, Aston, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Gladys Stuart, Wantagh, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr John Papandrea, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. As someone who worked in the waste management industry for a decade, I know how toxic the fracwater is and how environmentally disruptive the entire process is. Renewable safe energy like wind and solar are what we should be considering instead of destroying the environment with invasive and toxic resource recovery plans. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Cheryl Bescrypt, Fairless Hills, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. F. Joseph Uhrhane, Morristown, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Shirley Semple, Dover, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. gloria Paoli paoli, New York, NY

Dear Members of the Delaware River Basin Commission: I'm very glad to have read that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. On our family home, on acreage in Northeastern PA, we have been experiencing ever-increasing issues with our own water. There were no issues until fracking started occurring all around us. We know hydraulic fracturing AND THE PROCESSES ATTENDANT TO IT are far from benign. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. We need regulations that PERMANENTLY ban fracking and protect the watershed and surrounding communities from all fracking-related activities. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Mark Abushady, Long Island City, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Paul Wilson, Breinigsville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Diana Kraupner, Glen Head, NY

Dear Members of the Delaware River Basin Commission: I'm glad that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of federally unregulated fracking. Your recently released draft regulations are an important step in the right direction. However these rules do not go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need federal regulations that oversee or permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed unless it is tightly controlled by the federal government along with the states involved! Currently, fracking is not being done safely - it's being done as cheaply as possible by the companies involved. This should not be allowed to continue. If fracking can't be done safely and economically, then it should not be done at all. Thank you.

—Michael Cunningham, Milton, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Elizabeth Fewkes, Bradley Beach, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Janet McDonough, Randolph, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Mary Ellen Lewis, Carle Place, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Valentine Wolfe, Canandaigua, NY

Dear Members of the Delaware River Basin Commission: I'm glad you're working to protect the Delaware River Basin from the dangers of fracking. Your draft regulations are a step in the right direction but there are related matters that have me very worried. For example, what about the storage, treatment, and disposal of contaminated fracking wastewater? What about the companies drawing freshwater from the watershed to use in fracking someplace else? We need to permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed. I urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Paige Churchman, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Doug Schlitte, Delta, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Raymond Farrington, Syracuse, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —m/m Derek & Amory Stedman, West Chester, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. This is our drinking water, and the drinking water of our children and one day their children. We must do all that we can to keep it pure and safe! Thank you.

—Ms. Katherine Splain, North Massapequa, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Emily Labes, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Betty Gassner, Floral Park, NY

This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Sabrena Boekell, Nottingham, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—A1cleaning services representative Blanca Garcia, Paterson, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Amanda Jones, Jersey City, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Emmy Troise, Flushing, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! —Ms. Marie Baietto, Bayside, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This is NOT protecting the freshwater for 15 million people in 4 states. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Would you hesitate if it were your or your grandchildren's water? I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Ariana Buechel, Ithaca, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. My family and I fish, canoe and kayak in the Delaware River and no drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. John Rossi, Erie, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Nina Kellman, Englewood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Yajaira Rodriguez, Corona, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Carol WILLIAMS, Indiana, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —Ms. Marcy Neville, Keene Valley, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Ann Gastrich, Pound Ridge, NY

Dear Members of the Delaware River Basin Commission: I am encouraged and pleased to hear that you are proposing legislation to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough to protect people from the dangers of the fossil fuel industry and profiteers that would put profit in front of environmental and human safety, or worse, might seek to profit of the damage that could occur. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. please close these loopholes. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Christopher Wood, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Dana Spano, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Concerned Citizen, N/A, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Kimi Wei, Fair Lawn, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Irene Osten, Jamesburg, NJ

To the Delaware River Basin Commission: Please do not open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Please do not allow fracking companies to draw freshwater from the watershed for use in fracking elsewhere. Such actions will surely - it's only a matter of time - compromise the life supporting fresh water resource of the Delaware Basin. I'm not alone. Thousands of other concerns citizens make the same plea. Please do the right thing for Mother Nature, for us citizens, for our children and grandchildren. Please don't let us down.

—Thomas Tonon, Princeton Junction, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. I have added my name to other letters intended to protect the Basin from any use by frackers or any other polluters. Given the scope of the problems that drilling and water withdrawals can cause I sincerely hope that your count (thousands) is inaccurate. There should be millions of voices speaking out against companies that are willing to risk an irreplaceable resource for their own gain. Thank you.

—Mr. Francis William (Bill) Kunic, Irwin, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Charles Smith, Lake Hiawatha, NJ

Dear Members of the Delaware River Basin Commission: ***Please read the message below while also considering that I am a member of the Seneca Nation of Indians in Salamanca NY. We are currently fighting against Ephiaphany LLC in Coudersport PA to NOT allow dumping of frack waste into the headwaters of the Allegheny River which runs right through our Allegany Territory (Reservation). We are upset that although NY has banned fracking, there is still frack water dumping allowed in NYS!!!! This should not be the case. The Seneca Nation will stop at nothing to protect the water and to push for the ban of fracking and fracking activities in NYS. Please consider this just as important as your ban against fracking in NYS. And lastly, we need to move forward into renewable energy!!! This will help our Mother Earth to heal from all of the damages we have caused this far. **** I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Andrea John, Salamanca, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Brenda Hartman, Reading, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Cherise Pabia, Lansdale, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Susan Faust, Primos, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Sara Lewis, Croton on Hudson, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mr. Mark Vehec, Branchburg, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Carol Holden, Newark Valley, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Michael Rieser, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Charles F. Gordon, Saratoga Springs, NY

And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Joyce Montague, Gifford, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Nicole Gillespy, Maple Shade, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. John and Diane Alexanderson, Doylestown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. George Richnavsky, NEWFOUNDLAND, NJ

Dear Members of the Delaware River Basin Commission: Thank you for taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Thank you also for listening to and acting upon the concerns of citizens who live in the Delaware River Basin. The recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater, and they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I support regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Marie Leithauser, Lambertville, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Ronald Cook, Conewango Valley, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Marcia Robinson, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Stacy Zamudio Phd, Maplewood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Barbara Ciasco, Belleville, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Susannah Wexler, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! —Ms. Susan Green, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. A no-brainer, right!? Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. What the what!? This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Eric Mixon, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Lisa Lutter, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Rose Pappernek, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Gaye Wallace, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Catherine Smith, South New Berlin, NY

Dear Members of the Delaware River Basin Commission: As a long time canoeist on the Delaware River, I am thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. The Delaware is still a beautiful, untrammled waterway in its northern reaches, and we must continue to keep it so! Your recently released draft regulations are an important step in the right direction. **HOWEVER**, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Bill Nierstedt, Garwood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Heather Fox, Perkasi, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—thomas brown, horsham, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Daniel Brennan, East Rutherford, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Alivia Holmes, Kings Park, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mr. Elizabeth Ceron, unlisted private female citizen, NY

Dear Members of the Delaware River Basin Commission: I am thrilled to hear you are taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. We need powerful, clear regulations strong enough to permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. NO drilling, no fracking waste, and no water withdrawals should be allowed in the watershed - ever! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Virginia S. Gould, Wayne, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Gary Conklin, Watertown, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Linda Hiers, Jamestown, NY

—Ms Paula Joyce, Windsor, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. We need clean drinking water. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr George Viveiros, North Kingstown, RI

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Fully protect our waters. Once adulterated the water's adverse health impacts on humans and other species cannot be undone nor can the damage be truly repaired. Any mitigation will be too little too late for all. Protect our waters and support the public's wishes and the need of all the inhabitants of our home, planet earth, for healthy and unpolluted waters! Thank you.

—Mrs Iris Carman, Wilkesboro, NC

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Judy Terwilliger, St Petersburg, FL

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Kathleen Haley, Syracuse, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Laura Kolb-Araujo, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms K S, Pittsburgh, PA

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Hannah N. Ryan, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Stephanie Chen, Bellflower, AK

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Clare McCanna, New York, NY

As someone who has grown up drinking well water my whole life I am especially concerned with the idea that a natural resource can be polluted from the literal core. This is not an issue our forefathers had to even consider but thanks to chemicals and lubricants in drilling of natural gas we have not just factory run off to worry about these days in our drinking water. We have very dangerous threats to our health and our children's health from so many directions at this day and age. Please help to reassure us and your own families health and safety in what should be a basic right of the free and developed world. Not in my backyard. Not in my country. Please speak up for all of us. This is not a frivolous issue.

—Ms. Ashley Sawyer, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Linda Nowakowski, S.Cheektowaga, NY

Dear Members of the Delaware River Basin Commission: I'm glad that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. I urge you to go as far as possible to protect our water and the environment by putting in place regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. As written, the proposed regulations could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Galicia Outes, Brooklyn, NY

This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Morgan Pierce, Marietta, GA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Jana Ansel, Port Washington, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Matthew Mitchell, Blackwood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Christopher Bavaro, Middletown, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ryan Raimann, Flemington, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you. *Personal Note: I lived in Blairstown, NJ for several years as an outdoor educator and I know the Delaware River Basin as one of the most beautiful and natural places in the NY, NJ, and PA area. The river basin itself was already developed and reclaimed in the face of the Tocks Island Dam controversy, please don't risk this pristine area again.

—Eric Lee, Moorestown, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Steven Seland, ,

Dear Members of the Delaware River Basin Commission: "When the last tree is cut, the last fish is caught, and the last river is polluted; when to breathe the air is sickening, you will realize, too late, that wealth is not in bank accounts and that you can't eat money" I grew up in NJ my entire life. I spent my summers down the shore, went camping and fishing in the water gap, and frequented New Hope and Lambertville. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do: we need regulations that will permanently ban fracking and protect the watershed and her surrounding communities from all fracking-related activities. No drilling, fracking waste, or water withdrawals should be allowed in the watershed. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. I moved away from home about seven years ago, and recently found out I'm going to have my first child, a girl, in September of this year. My husband and I both agree that for her best interests, we should move back home to New Jersey. Upon hearing the news that there is a possibility of fracking in the watershed, it troubles me to think my daughter would be exposed to these toxins, and not be able to enjoy the same experiences I did as a child growing up in the garden state. I do hope you will all work tirelessly to pass the required legislation to protect our fragile ecosystem. Thank you.

—Leigh-Ann O'Donnell, Summerville, SC

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Timothy Freudenrich, Lumberton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Thomas Boon, Hillsborough, NJ

Dear Members of the Delaware River Basin Commission: I use the area often for recreation and would be devastated to see it opened for fracking. New Jersey has been at the fore front of renewables for years and we should be focusing on that as opposed to older and dirty forms of energy. There is no future in fossil fuels. Given that, I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —David Spellman, Great Meadows, NJ

Dear Members of the Delaware River Basin Commission: I grew up in Warren County, NJ, just a few miles from the Delaware Water Gap. I still live in NJ, and my parents are still in Warren County. This is beautiful country, and must be protected. I'm a civilian scientist for the Army (background in materials development with emphasis on Environmental Safety), and let me tell you - there is no good reason to open this area up to fracking. In fact, as technology progresses, there's no good reason to frack at all. Let NJ, NY, PA, and DE lead the way to a brighter future. There is no reason to fall down a corrupt hole of profits. Protect this great land, it's your duty as a civil servant. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Daniel Zaloga, Montclair, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Andrew Chang, New York, NY

Frack here and i will take my business elsewhere. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Jack Fin, Point pleasant, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Daniel Kuhn, Bellefonte, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Sean Ryan, Belford, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Anton Sax, Rolla, MO

Dear Members of the Delaware River Basin Commission: It makes me proud to live in a state that has representatives willing to adhere to its constitution. All Pennsylvanians are lucky that we have an amendment such as the Environmental Rights Amendment. Thank you for taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. It's unthinkable that we're considering exposing the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. These rules could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Timothy Rixner, Dunmore, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. —Joe Lapinski, Hawley, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I am a New Jersey native and the water gap holds a special place in all our hearts here. It is more than a pretty drive or a pretty hike-this river basin is our lifeblood. Growing up in Newark I didn't have access to much nature. The city parks were paved with concrete, and the swamps around me had been turned into industrial wasteland. We must do all we can to protect what little we have left. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Nelson Hopp, ,

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Bradstreet Rand, Basking Ridge, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will NOT do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! You propose to ban fracking but to allow dumping. I don't believe you have considered the consequences. Let me predict what will happen if dumping of fracking wastes is allowed in our water. Philadelphia is my adopted home and the inhabitants here comprise a not-inconsequential part of the 15 MILLION people who obtain their water from the Delaware River. What do you think that Philadelphians will do when they understand this intent to poison, sicken, and kill us by dumping fracking wastes into our water? Do you believe - even for one second - that we will sit here and do nothing? I have been talking to people about your proposal, and universally people say they will move from Philadelphia. These are people who pay taxes, and what will happen is that the tax base of this city will depart. Philadelphia pumps BILLIONS of dollars yearly into Pennsylvania's coffers, and this will vanish when the tax base disappears. Philadelphia - a wonderful vibrant - will die. Dumping of fracking wastes will destroy us. Is this what you want? Do you really want to destroy us? There is much I could say to you about the dangers of fracking...the lack of respect your dumping proposal evinces for the vibrant ecosystem of the river that links all life - animals, plants, people. Your proposal to poison the water with fracking wastes has NOTHING to recommend it. NO ONE whose water comes from the Delaware wants this. SO, the question is WHY would you propose this and WHO benefits? It certainly isn't the residents of Philadelphia and all the other communities that obtain their water from the river. What it appears is that the ONLY ones to benefit are greedy fat-cat frackers with dreams of becoming obscenely wealthy through the harvest and export of natural gas, with absolutely NO regard or caring for the consequences of a despicable dinosaur technology that has no sane reason to exist. I, along with thousands of other concerned citizens, DEMAND that you pursue a FULL PERMANENT BAN on ALL fracking, on ALL dumping, and on ALL fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Molly Karpin, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Christopher Curving, Budd Lake, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Susan Davis, East Islip, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Christine Grace, Robbinsville, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Mrs. Nancy Reinking, Colorado Springs, CO

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Some of you have children, some of you live here. You are part of the fifteen million people that this could affect. I don't know much about fracking, but what I do know, and what matters is the fact that it will only harm people, contaminate the very essence of our life. We can only last four days at most without it. Doing this, going forward and pushing new legislation will be a lot harder than four days of work but each day that you wake up, each day you turn on the faucet, to put your tooth brush under the water and wash your teeth, you cup your hands to fill with water and clean your face, each time you come home exhausted after a long day of work (which I am grateful you do) and you take a nice warm shower (unless you take it in the morning, I'm personally a night shower-er but to each their own) think about how dirty and wasted and unconsumable that it will become if someone decides to frack. Also, think about the other potential dangers of fracking. Earthquakes maybe? I've personally only been through a few, one really terrible one and they are terrifying. I don't want to have to grab my kids and huddle under the door frame despite their want to go and have fun because of how exciting it is to have the earth shaking. Even if you do not decide to ban fracking in the Delaware River Basin, I want to thank you for work that you have been and are doing. But please, think about what an impact this could make.

—Elizabeth Keen, ,

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs Debbie King, Little Rock, AR

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Rebecca MacMillan, Beverly, NJ
