

Natural Resources Defense Council

Members of the Delaware River Basin Commission,

Please accept these 11,343 public comments from online members and activists on behalf of the Natural Resources Defense Council regarding the revised draft regulations in support of stronger regulations banning fracking. While the draft regulations ban fracking, the rules and regulations as written could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater, potentially endangering drinking water sources for 15 million Americans. For this reason we urge you to pursue a full ban on fracking and all fracking-related activities in the Delaware River Basin. Thank you.

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction, however, I don't believe they go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Megan Friend, brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction, however, I don't believe they go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Rosemarie Wiegman, Tacoma, WA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction, however, I don't believe they go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I may not be a resident of the US who lives within or close to the Delaware River Basin, but I love the natural environment of this country. I want to make sure that the natural habitats of this country or not ruined, developed over, or scarred by construction of more natural gas pipelines. Natural gas is not a renewable energy source. We'll eventually run out of it if we keep using it, but the process of extracting it is environmentally destructive. Many towns and communities in the Northeast have suffered water pollution problems because of fracking. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. I'm putting my faith and reliance in all of you, members of Congress who are not from my state, because I don't want a large watershed basin containing the largest free flowing river in the Northeast to become polluted from fracking and wastewater contamination. I please ask that you listen not just to the people who live in and around the Delaware River Basin, but also those who live outside of it, including myself. I love the natural environment there just as much as I love anywhere else, including the natural habitats of my home state. Please do everything you can to push for the establishment of stricter and stronger laws restricting tracking within the basin. Thank you.

—Mr. Joshua Altshuler, Falmouth, MA

No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Iris Rochkind, East Elmhurst, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—ricky tran, Kenilworth, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. John Branigan, Maplewood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—JULIA LITTELL, ARDMORE, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Andrea Greene, Queensbury, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Bonnie Prosser, Holland Patent, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. B. Coleman, Kew Gardens, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Garry Taroli, Wilkes Barre, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. William Wurtz, NY, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Andrew Joncus, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Matthew Mandiak, East Syracuse, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Elizabeth Penta, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Matthew Mewton, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. (Mrs.) Vanna Cleary, Bloomsburg, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. —Mr. Nathaniel Hansen, Long Island City, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. wm griffiths, Hudson, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Terri Knauber, Cheektowaga, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Steve Schulek, Keyport, NJ

Dear Members of the Delaware River Basin Commission: I'm happy to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This is unacceptable. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you for your attention.

—Ms. Martha Smith, Elmira, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Steve Troyanovich, Florence, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Susan Kempson, Kinnelon, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Lynn Kline, New Hope, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Kyle Davis, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —Ms. Gail Goldsmith, NEW YORK, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. I am so grateful for Gov. Cuomo for banning fracking in the Catskills but am aware that there are still permits being issued for pipelines and that the Delaware River Basin itself is not protected. I find it difficult to believe that it would not be foremost on your lists of things to accomplish. If the drinking water is not safe, what do your constituents have? Where can they get drinking water? How can they live in their homes, and work in the area? What happens to the economy of the region? It seems foolhardy not to protect the DRB watershed from the dangers of fracking and pipeline development. Thank you.

—Ms. Ellen Fauerbach, Denver, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Michael Nusbaum, Pottstown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Barbara Mintz, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Penny Grossman, New Rochelle, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robin Terk, Cobleskill, NY

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Suzanne Staggenborg, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. & Mrs. Joseph & Lynn DiBlanca, Highland, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Philip Thomas, Highland Park, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Betsy Mayo, Bay Shore, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you, Marcia States

—Ms. marcia states, Bath, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—DR. STEVEN Liakos, Moorestown, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Connie Hamilton, Milford, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —RACHEL FISHBEIN, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Al Balaban, Lebanon, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jared Brenner, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dave Cooksley, Collegeville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! All aspects of fracking should be banned from beginning to end. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Richard Van Aken, Holland, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Devon Tipp, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Suan Rose, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Adam Vrbanic, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm pleased by the steps being taken to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. However, I don't believe the draft regulations go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater, and could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Diana Krantz, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jose Leroux, Westmount, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Leslie Harper, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Bill Elbert, Mountaintop, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. David Fiedler, Bensalem, PA

Dear Members of the Delaware River Basin Commission: As an environmental scientist, I'm happy to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. They could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater and could allow companies to draw freshwater from the watershed for fracking elsewhere. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed. Fracking contributes to climate change, as methane is an extremely powerful greenhouse gas, and leaks are inevitable. I, along with thousands of other concerned citizens and scientists, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Judith S. Weis, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. John Wesner, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Sandra Thorn, East Hampton, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Marilyn Catherine, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dorothy Chauvin, Morrisonville, NY

Dear Members of the Delaware River Basin Commission: HAPPY TO HEAR you're taking steps to 'PROTECT' the Delaware River Basin and the DRINKING WATER of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. IT'S INSANE THAT AMERICANS HAVE TO FIGHT FOR PROTECTION FOR OUR DRINKING WATER. *** LEGISLATORS WHO REFUSE TO PROTECT US WILL BE 'VOTED OUT OF OFFICE' a.s.a.p. FOR THE GOOD OF OUR STATE, NATION & OUR SHARED PLANET. As written, they could open the watershed to the storage, treatment, and disposal of CONTAMINATED FRACKING WASTEWATER..... And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. TOTALLY UNACCEPTABLE. WHY CATER TO POLLUTERS. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to PURSUE FULL BAN on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Anita Buffer, Warminster, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Linda Laundra, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Carla Berkley, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Anne Patrone, Hoboken, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Deanne O'Donnell, Derry, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. brian schwartz, Freehold, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Adam Ludwig, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I fully endorse both NRDC's praise for your draft regulations preventing fracking in the Delaware River Basin and its reservations that you leave the door open to fracking-related activities of storing and disposal of fracking waste-water. Please don't stop short of blocking ALL fracking related activities from the Delaware River Basin. It is crucial that we preserve our drinking water in the Northeast from any contamination, and to do this, your recommendations must be absolute and unequivocal. Continue, please, your good work by removing any loopholes that could be used by the fracking industry to make any use at all of the Delaware River Basin water.

—Mr. Mitchell Mitchell Miller, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Roxanne Christie, Parish, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Nancy Goldman, West Nyack, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Anthony Coulter, Peekskill, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Cleopatra Tsanis-Tsimikas, FRESH MEADOWS, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Denise Frullo, Westwood, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Van Jordan, Princeton, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Joseph Lawson, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mr. Barry Plaxen, Bloomingburg, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Fracking has been PROVEN to be detrimental to the environment and has been PROVEN to adversely impact the health of your constituents. Moreover, a ban on fracking would help us fight back against the pipeline proliferation that is further endangering the land, air, water and citizenry of the United States. Many countries are banning fracking. I urge you to take a moral and ethical stand against the fossil fuel industry and join them in doing what is right for the people you represent and for the world as a whole. I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you. Robin LaSon

—Ms. Robin LaSon, Lititz, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Sandra Washburn, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Caren Veder, Somerset, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Katherine Vailakis, Saugerties, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Fracking water and use of water for fracking will contaminate this important source of pure water and will foster global warming by encouraging fossil fuel extraction and burning. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. cenie cafarelli, Pittsford, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Jessica n, Lauren, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Carole Licht, Venus, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Steven Zimmerman, Pine Grove, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Linda Mengon, Freedom, PA

Dear DRBC Members, Thank you for moving to safeguard the Delaware River Basin and the health of our region's people and environment from the dangers of fracking. With private companies and the federal government actively seeking any possible legal opening to dismantle and exploit environmental protections, we need strong regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. Please include clear, strong language prohibiting storage, treatment, and disposal of contaminated fracking wastewater, as well as withdrawal of freshwater for use in fracking operations. A full ban on fracking and fracking-related activities is critical to preserve the health of our people and communities, the vitality of our habitats, the recreational value of our region, and the development of clean renewable energy technologies!

—Mr. Bryan Hadick, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Peg Thompson, Glenmoore, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Larry Seymour, Factoryville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Ms. Eileen Eglin, Andes, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. L. M. Arrigale, AMBLER, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Noelle M. Mcguire Davi, Oradell, NJ

Dear Members of the Delaware River Basin Commission: It is good to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. And where will all the people living around this contaminated area then find clean water for their families? This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Ann McKee, Fallsington, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Richard Carp, Staten Island, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Stephanie Feyne, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Joseph Bettencourt, Poughkeepsie, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Professor Christiane Pors, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Smith, York, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Holly Altenderfer, Reading, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Ursula Mitra, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. **WE CERTAINLY DO NOT NEED ANOTHER FLINT MICHIGAN TYPE POLLUTION DISASTER AFFECTING MILLIONS OF PERSONS DRINKING WATER** As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. **YOU WILL BE PERSONALLY BLAMED FOR THIS CATASTROPHY** This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! **YOU AND YOUR HEIRS WILL PAY FOR THE DAMAGE CAUSED BY YOUR INACTION AND LACK OF CONCERN** I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. John Taylor, Mountain Top, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Olivia duBourg, Cohoes, NY

Dear Members of the Delaware River Basin Commission: Thank you for the draft regulations to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. But given the importance of preserving our water supplies, and abating climate change chaos, we need to stop fracking altogether. That means to close down fracking-related activities such as storage of waste water from the drilling, spreading of fracking waste on roads that leaches into rivers, and so on. These are part of the fiasco that shale drilling has brought to the environment. Your recently released draft regulations are an important step in the right direction. But we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Please tighten the regulations to help keep our health, water, and communities safe from harm. Thank you.

—Ms. Jill McManus, NY, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! —Ms. Susanne Wright, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Christopher Sauer, Abbottstown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Derek C. Foster, Ballston Lake, NY

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—sandra moore, Glenshaw, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Elizabeth Plummer, West Chester, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. **THIS WILL NEVER DO** -- we need regulations that **PERMANENTLY** ban fracking to protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Helen Moss, Forest Hills, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Renee Palmonari, Voorhees, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Kathy Bepler, Media, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. What about those of us in other watersheds? Don't we deserve equal protection? Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Henry B. Berkowitz, Sabinsville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. Rainer Hammerschmidt, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Donna Plummer, Harrisburg, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. We want our children to be able to grow up without the undeniably harmful physical side-effects that occur from fracking. Thank you.

—Mrs. Santosha Long, Center valley, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Paul Austermehele, Fountainville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Enid Lebid, Somers, NY

Commission Members of the Delaware River Basin: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Concerning your draft regulations, please make sure that you do not open the watershed to wastewater from fracking or allow companies to take water from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. I.J. DuBois, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. & Mrs. P & T Zieba, Glendale, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert J Gallati, Slingerlands, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Stephen Scheib, New Castle, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I am a well owner and depend on my well for water. These practices fill me with fear of our water being contaminated. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. WINIFRED LUTZ, Huntingdon Valley, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms Marni Ebersole, Saratoga Springs, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Sister Doris Johnson, Claymont, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Stephen Spicehandler, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Gilda F. Pervin, New York, NY

—Dr. Kathleen Boone, BUFFALO, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! It seems useless to continually say this, but I say this anyway: fracking results in pollutants being dumped in our water system. A polluted water system is a threat to our national health. The equation here is simple: water = life. Without clean water, people who would otherwise live may become sick, disabled or die. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Les Von Losberg, Sleepy Hollow, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Paul Nasuti, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Right now, ANY sort of Fracking activities can imperil the Water Supply... Please exercise FULL caution here!! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Zvi I. Weiss, Edison, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Howard Katz, Riegelsville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Kristina Younger, Petersburg, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Bernie Iantosca, NORWICH, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Vernon Simonet, Dingmans Ferry, PA

Dear Members of the Delaware River Basin Commission: I was so thrilled to hear that you're taking steps to protect from the dangers of fracking the Delaware River Basin, which is the source of drinking water for 15 million people. Your recently-released draft regulations are an important step in the right direction, but I do wish you'd go further. Unfortunately, and perhaps accidentally, the draft regulations could be interpreted to open the watershed to the unsafe storage, treatment, and disposal of contaminated fracking wastewater. They could also be viewed to allow companies to draw freshwater from the watershed for use in fracking elsewhere. I hope you will take the steps necessary so these regulations permanently ban fracking and protect this vital watershed and its surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Amy Posner, Lido Beach, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Thomas Regan, Fresh Meadows, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Wayne Failing, Lake Placid, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jonathan Rosenthal, New Paltz, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Claudia Snow Classon, Princeton, NJ

Dear Members of the Delaware River Basin Commission: I'm pleased that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, the rules could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. Why should we do that? If people in other states want fracking, let them keep the fallout. We need and want regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! Attacking fresh water for profit is sinful. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Valerie Heinonen, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Douglas Leihbacher, Tarrytown, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Christopher Locovare, Bay Shore, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Carla Mariani, Philadelphia, PA

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Matthew Adler, Whitestone, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. John Cardoni, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Alyce Callison, Havertown, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Joel Leitner, Larchmont, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Lee K. Clayton, DE

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Tara Gallagher, New Rochelle, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Traci Arnold, Sarver, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Olga Vannucci, Pittstown, NJ

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Robin Dunnington, Holley, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Chris McNeely, Ocean View, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Kathy Retherford, Cornwall, PA

Dear Members of the Delaware River Basin Commission: Thank you, sincerely. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Please consider any and all additional measures, not simply nice to have, but imperative. We're living in a time of devastating storms and other acts of nature but nature heals itself from its own activity. One might say these activities, as violent as they can be, in fact, are acts of healing... of nature asserting itself over man's persistent abuses. Nature does not easily heal from the unnatural ravages of resources exploitation, environmental contamination and destruction. Even the best engineered plans to control and limit our impact are dwarfed by nature's ability to cast us off like flies. The only sure and true protection of the Delaware Basin resource is a complete and total ban of fracking and all related activities, period. Full stop. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. Fracking waste water is poison. Would you invite children to drink, bathe in it, play in it? The blessing of the Delaware basin flows from the taps of millions of people every day, supporting and giving life. It is not someone else's life. It is your life, it is our life and we must protect it. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you, Guy Mastriion

—Mr. Guy Mastriion, Greenfield Center, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —NANCY HARTER, ,

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Ellis Coleman, Kennett Square, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Jann Jasper, Plainfield, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Ms. Audrey Levin, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I am concerned that these rules may not go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw fresh water from the watershed for use in fracking elsewhere. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Gary Cohen, King of Prussia, PA

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Greg Cutler, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Joanna McNeilly, Woodside, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Karen Heuler, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. —Ms. Susan Wald, New York, NY

Dear Members of the Delaware River Basin Commission: I am excited to hear that you are taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I do not believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Linda M. Hassa, Brick, NJ

Dear Members of the Delaware River Basin Commission: In my opinion, fracking is dangerous and unnecessary. Dangerous because it can contaminate drinking water, and unnecessary because we found already more fossil fuel on this planet than we should ever burn. I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr. K Paul Muller, Wappingers Fl, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Pat Wall, Victor, NY

Dear Members of the Delaware River Basin Commission: I am extremely concerned about the devastating effects of fracking on the water supply, and on the environment in general, which is why I congratulate you on taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. I am writing to encourage you to go much further. Although your recently released draft regulations are an important step in the right direction, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. Fracking should not be allowed anywhere. Period. And we should be doing nothing to facilitate it. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed, or anywhere else. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Kathryn Hjelle, Red Bank, NJ

Dear Members of the Delaware River Basin Commission: I am extremely concerned about the devastating effects of fracking on the water supply, and on the environment in general, which is why I congratulate you on taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. —Ms. Sheryl Rhodes, Honeoye Falls, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Debra George, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Diane Krieger, Port Jefferson, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Daniel Barclay, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mrs. Teresa Costello, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Ieva Berzins, Bethel Park, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Randy O. Callaway, Atco, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Keely Farrell, Cresskill, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jon Gordon, Brooklyn, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Sister Virginia Patrick, New York, NY

This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Joshua Saks, Morristown, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Carol J Puchyr, Kearny, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr Kumar Nagarajan, Albertson, NY

Dear Members of the Delaware River Basin Commission: I appreciate that you're taking steps to protect the Delaware River Basin and the drinking water it provides from the dangers of fracking. Your recently released draft regulations are an important first step, however, I don't believe these rules go far enough. As written they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. I believe we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed. I urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. George Huckins, Weehawken, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Diane E McCloskey, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Leslie Zuverink, Monroeville, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Robert Sandgrund, Buffalo, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Scott Evers, Long Beach, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Rosemary Hayes, Mays Landing, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Michael Madden, New City, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jerry Boxman, Hanover, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Barry Maisel, saratoga springs, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Karen Diefenbach, Tarrytown, NY

Dear Members of the Delaware River Basin Commission: Like many, I am pleased you are taking steps to protect the Delaware River Basin and the drinking water that originates from there for the 15 million people who use it, by taking action against fracking. Your recently released draft regulations are an important step in the right direction but I'm concerned these rules go far enough. As written, they could still open the watershed to the storage, treatment and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. We need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed. Too much is at stake. I urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Alexander Chee, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Carolyn Thomas, New Castle, DE

Hello Delaware River Basin Commission: I'm thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking! Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go FAR ENOUGH. As written, there is a potential to open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And companies could also be allowed to draw freshwater from the watershed for use in fracking elsewhere. We need regulations that PERMANENTLY BAN FRACKING and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in this precious watershed! I, a native Delawarean and lifelong lover of the Delaware River, urge you to pursue a FULL BAN on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thanks for your time.

—Ms. A Stewart, Newark, DE

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—George Patterson, NEW YORK, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. —Mr James Cappellino, Rochester, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerns citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Miss Lucia Lavelle, Philadelphia, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Dr Mary Ann Gdula, Basking Ridge, NJ

I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Ms. Shawna Wright, Brooklyn, NY

Members of the Delaware River Basin Commission: God gave us a life sustaining environment. We appear to be very busy destroying every single aspect of it, in as fast a way as possible, for the benefit of a very small proportion of one species, humans. I'm impressed to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 MILLION people from the dangers of fracking and your recently released draft regulations are an important step in the right direction but they don't go far enough. As written, they will open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. In other words, to POISONS. They will allow companies to draw fresh God given, life sustaining water from the watershed for use in fracking elsewhere. Since fracking uses MILLIONS of gallons per well, and once used the water is non-life sustaining, what kind of thought process would allow such a suicidal activity? Regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities is the bottom line. PERIOD. Water withdrawals for fracking should be banned everywhere. PERIOD. We live in God's system of recycling so there is NO MORE EXTRA CLEAN WATER ANYWHERE. What we put in our water is there to stay. It is one continuous system throughout the world. The poisons we put in are there to stay. We have the technologies for clean, renewable energy yet we're allowing the rest of the world to profit and work in the development and use of this brilliant technology (translation JOBS) as we continue to pollute and kill ourselves. We're protecting deadly fracking, just like we protected deadly coal, and for what reason? The few greedy people that will always put cash before life. I urge you, for my family and others, to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. rebecca A. kuligowski, Cambridge Springs, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Charles Wittman, Amityville, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mrs. Melinda Geiger, Freedom, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. —Mr. Jason Stiffler, Pittsburgh, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. David Zanardelli, Eighty Four, PA

Dear Members of the Delaware River Basin Commission: Thank you for your plan to protect the Delaware River Basin and our drinking water from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, as written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. That is not good enough. We must permanently ban fracking to protect the watershed and local communities from fracking-related activities. Drilling, fracking waste, and water withdrawals should never be allowed in the watershed! Please pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from fracking-related harm. Thank you.

—Mr. David Limburg, Nelsonville, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Mr. Jake Shirmer, New York, NY

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Thank you.

—Irma & Louis Esakoff, Roosevelt, NJ

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater. And they could also allow companies to draw freshwater from the watershed for use in fracking elsewhere. This will not do -- we need regulations that permanently ban fracking and protect the watershed and surrounding communities from all fracking-related activities. No drilling, no fracking waste, and no water withdrawals should be allowed in the watershed! I, along with thousands of other concerned citizens, urge you to pursue a full ban on fracking and fracking-related activities to keep our health, water, and communities safe from harm. Please take the above recommendations seriously and add them to your draft regulations. Drinking water in this huge area will only be safe if you do. Thank you. Mrs. P. Brotman, Pa. Thank you.

—Ms. Patty Brotman, Bala cynwyd, PA

Dear Members of the Delaware River Basin Commission: I'm so thrilled to hear that you're taking steps to protect the Delaware River Basin and the drinking water of 15 million people from the dangers of fracking. Your recently released draft regulations are an important step in the right direction. However, I don't believe these rules go far enough. As written, they could open the watershed to the storage, treatment, and disposal of contaminated fracking wastewater.
