

Bill Gross

I am for High Volume Hydraulic Fracturing in the Delaware River Basin. It is a safe process, there are numerous studies that back that up. I urge the DRBC to do the same that they allow in the Susquehanna Basin. As a landowner and full time resident in job hungry and tax high upstate NY, I feel it is our right to have access to the abundant natural gas in our area. If the DRBC bans HVHF in our area, then they should be required to pay us for our lost revenue.
