

David Kagan

I have personally witnessed and had to live through the terrible disruption of a once peaceful life caused by the hydraulic fracturing industry here in north central Pennsylvania. Beginning in 2008 truck traffic up my Route 44 along idyllic Pine Creek became horrendous, 7 days and week, 24 hours a day, with triaxles and semis roaring up and down in front of my house. Please don't allow this to continue and expand into other areas. It is past time to REDUCE our dependence on fossil fuels and to vigorously pursue renewable energy sources instead. Thank you for myself, my family, my friends, and future generations.
