

Sharon Aveni

It is a fact that dangerous chemicals are used for fracking. It is also a fact that those same chemicals pollute Our water. When more jobs can be created in the implementation of sustainable energy, I am only left to believe that you choose destruction over creativity. Greed thinks not of the future of even it's own chilren and grandchildren. Greed is impulsive, arrogant and heartless. Choose wisely, for we will not live forever and will suffer the consequences of our heartless choices
