

## Dorothy Jackson

The Delaware River Basin is an environmental treasure. It must have a permanent ban on fracking and pipelines to protect it. As the largest river on the eastern seaboard, it is environmentally sensitive area that supplies drinking water for more than 17 million people. Furthermore, large portions of the river have been designated Wild and Scenic by the Department of the Interior. Please (1) completely ban fracking, and (2) prevent fracking waste from being dumped into the river! It is critical that the Delaware River is protected for generations to come. Thank you for your consideration.
