

Elizabeth bowman

Fracking benefits nobody except the gas companies and has been found to do terrible damage to the environment, the stability of underground structures (note the increase in earthquake activity in Oklahoma blamed on fracking) and our drinking water. Who knows what it would do to the River. Fracking is a short-sighted practice at a time when the world needs to be developing renewable energy. Please think into the longer future and deny fracking here for the sake of us all.
