

## Cloud Gate

Hydraulic Fracturing "fracking" is absolutely poisoning and devaluing water, air & property. The short sighted monetary gain is a longer term monetary loss and a what devastating loss this corrupt industry is fueling.

Methane leaking from Fracking sites was low-balled in initial industry figures. Now we see catastrophic amounts are leaking from these wells & through landscapes as the fractured land emits increased radiation & toxic greenhouse gasses as well.

I'd like to remain in this region with my business and my family. Is like my children not to have asthma, not to develop cancer,.. Clean water and clean air should be standards of progress.

Fossil fuels are the dead horse. They are not investment, they are addiction. Ban Fracking. Other nations with sense have led the way.
