

Philip Cowan

While we commend you banning fracking in the Delaware River Basin we would like to see all activity related to fracking banned. We understand your term of "discourage" relating to fracking wastewater etc., and assume a full ban on all activities would create a major backlash. We can only hope if wastewater treatment and water transport are permitted you have the manpower to closely monitor these activities to ensure they are done properly. We lived in Alaska for decades and the oil companies "assured" us it was safe to "transport" oil from the port of Valdez. You know how that turned out. Tanker trucks driving through the basin loaded with toxic wastewater are an accident waiting to happen. Thank You. Phil Cowan, Nina Daley. Upper Delaware riverfront property owners.
