

Soaring Eagle Campground

I am writing to urge the DRBC to ban fracking in the Delaware River Watershed. The Delaware is a national treasure the most pristine river in the North East. With so much biodiversity. The streams and tributaries that flow into the river are special protected waters. I hold the DRBC with great esteem for having a moritorium on fracking since 2011. Please continue to protect the watershed that provides drinking water for millions of people. I live on the river and have a campground ... people that come here love how clean this river is. My greatest fear is that it will be contaminated by fracking. Please continue to be good stewards of this watershed and ban fracking forever. thank you Anne Backlund Soaring Eagle Campground Equinuk PA
