

## Jeanne Wasman

Please completely and permanently ban natural gas drilling and fracking and all related activities throughout the Delaware river watershed. I can see clearly that the people who are in favor of fracking are, for the most part, motivated by the possibility that they might make some money from it. It's also clear to me that the folks who support the ban are motivated by a love for the beauty and sacredness of nature and a desire to protect her, and a recognition that our health and well being is dependent upon the purity of our drinking water. Nothing, in my mind, could be more important than this issue. Please ban fracking. Thank you.
